MS-64 GOLD MAKES PRICE DEBUT

Original Mercury Rolls In Strong Demand

The Market in Depth

You asked for it. The majority of the dealers are using it; so we've listed it: MS-64 U.S. gold. The price spread between MS-63 and MS-65 has widened dramatically over the past year. Many dealers are pricing in-between coins at in-between prices. As it is, MS-65 gold is quite difficult to locate. When a hoard (more than 2 coins in this case) is found, they will usually bring over bid levels. More often than not, the nicer quality coins which change hands are a mark away from MS-65, but, are definitely better than MS-63. Any dealer with half a brain would not sell this quality coin for MS-63 money; he will price it somewhere between MS-63 & 65. We have taken this opportunity to list MS-64 bid and ask. We have calculated these prices by monitoring all the dealers who list the MS-64 grade. Over the next few weeks these prices may fluctuate somewhat, while more dealers begin to establish their own actual buy/sell prices.

To further validate the use of the MS-64 grade, one has to look no farther than dealer advertisements to see the extensive use of this grade. Some dealers call it MS-63 premium grade, others MS-63+. The majority use MS-64, which is in keeping with the already accepted numerical grading system. Just recently, NCI announced that they plan to incorporate MS-64 in their grading service. This may lead the way for other grading services to follow suit.

This first issue of 1986 finds many dealers preparing for and attending the always active FUN Show. Now don't mistake "active" for meaning all issues are increasing in value. This is not so. This show is a good indication of the direction in which the individual series will head. The various series in distinguished grades will seek and find, not only their directions, but, their levels of value. The marketmakers will be a good indication of these levels for the issues in which they are interested. As we all know, this is the demand factor in the equation. Whether supplies of fresh material will be available to help stimulate the market will be a question better answered in the weeks to come. There are several major dealers advocating MS-63 & 64 material in their sales advertisements. As long as this grade material is priced accordingly, it may be a good investment for the future. The key phrase is "priced accordingly". There are definitely more people comfortable with grading MS-63 or MS-64 coins than are grading MS-65's. There are more dealers willing to deal in MS-63 and MS-64 coins who feel there is not as much downside at current price levels.

This Week's Market

CENTS: In general, BU Lincoln cents are a very monotonous series. Most interest is directed downward as various dates are offered at lower levels. Recently, an oddity surfaced, as an original bag of 1947-D cents was offered for sale; yet, within current levels.

NICKELS: Although just a little more active than Lincoln cents, BU Jefferson rolls, for the most part, are receiving limited attention. The most active roll, at the moment, seems to be the 1950-D. There are several buyers and sellers within current spreads. The few changes are minimal this week with 1941-D, S & 52-D higher, while the 42-S & 47-S are lower.

DIMES: Original Mercury dime rolls jumped this past week as bidders try to locate coins that meet MS-65 standards. Several buyers are in the market for MS-65 singles, with some gladly paying over bid to corral the quantities necessary to satisfy new demand by investors. Most of the dates wanted are in the late 1930's thru 1945.

BU Roosevelt dime rolls are simply stable at current levels with no major supply/demand changes.

QUARTERS: BU Washington quarter rolls are indicating lackluster demand at this time. There are very few blanket buys monitored; only a few specific dates with limited quantities needed. Those required are usually only purchased if they can be found at bid. The 1955-D roll was quite active this week as many different sellers offered rolls at bid or less.

HALVES: There appears to be occasional business being done in BU Franklins, but again, mostly limited by quantities and specific dates. Two dates are lower this week as buyers ignore the 1948-P and 1949-S rolls. The BU 1970-D Kennedy roll has been offered frequently by several dealers.

DOLLARS: There have been few noticeable changes in circulated dollars up through MS-63's. Changes in Mint State specimens are limited to Carson City dollars in MS-64 and 65 along with a few other specific dates in MS-65. One east coast dealer is making a valiant attempt to outbid other marketmakers for the short supply of true MS-65 coins.

Although MS-65 prooflike dollars appear to be ignored, such is not the case. Numerous dealers remain in this market in an attempt to buy coins, but are not trying to needlessly run bids up.

Silver Ike dollars continue to increase in value despite the fact that some prognosticators feel they are due to fall. The strong buyers still need quantities.

PROOF SETS and MINT SETS: Proof sets are relatively stable at this time, with just a few plus signs for late-date sets. Mint sets, on the other hand, do not see as much action. The 1970 and 1981 sets are lower.

COMMEMORATIVES: New, active bidders can be found for MS-65 commems. In most issues they are willing to pay ask for strictly graded coins. Many of the PDS sets are extremely difficult to locate.

TYPE: MS-65 type coins continue to reflect some downward movement. This is not necessarily a sign of weakness, but is an indication that the higher buyers, who supported this market, have lowered their buy prices.

GOLD: MS-60 and MS-63 U.S. gold continues to be sought at higher levels. The only change here is the number of high buyers has decreased somewhat. But, this may only be a sign of the holidays.

FOREIGN GOLD: (Modern & restrikes. Traded in BU condition.)

Bullion related gold coins in this issue are figured on a basis of gold at $327.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-61 (UNCIRCULATED) Will have a few bag marks may show rubbing or light wear on the high points have full luster and have few scratches or other defects of average severity.

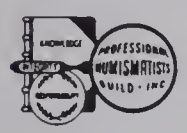
MS-63 (UNCIRCULATED) Will have several bag marks may show rubbing or light wear on the high points have full luster and have few scratches or other defects of average severity.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning) May exhibit some field distractions, but none major May have a few minor cheek contact marks Definitely nicer than an MS-63 Must have eye appeal

MS-65 (UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning) Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date Must have eye appeal

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

YES VIRGINIA, THERE IS AN MS-64 GRADE!



It's time to be realistic. Whether some purists like it or not, intermediate MS grades are likely here to stay. We hope to see them listed soon in the Coin Dealer Newsletter, and to gradually achieve acceptance throughout the numismatic marketplace. The reasons are obvious. Firstly - like snowflakes - no two coins are exactly alike. One has a hairline here . . . a scratch there . . . a rub . . . a planchet defect . . . a lint mark . . . bag mark . . . etc. You know as well as we do.

When a gold type coin carries a CDN bid of $1,800 in MS-63 and $7,300 in MS-65, an intermediate (i.e. MS-64) category is a necessity . . . in fact there must be a whole range of this coin type worth $3,000, $4,000, $5,000, etc! Let's face it . . . the MS system is a guide at best, but it's the best thing we have. So let's use it with maximum flexibility.

We need quantities of MS-60+, MS-64, as well as MS-60 and MS-63 U.S. gold coins. We buy and sell millions of dollars worth every year. If we didn't pay fair prices we would be out of business . . . so call us. We are one of the biggest U.S. gold coin wholesalers in the country, celebrating our 25th anniversary.

Here are our current buy offers:

COMMEMS STRONGEST AREA OF MARKET

FUN Show Draws Large Crowds

The Market in Depth

"Pollyannas" think the market is strong and will not slow down. In some issues the market has not slowed: Commemoratives, all grades; MS-65 dollars; and strictly graded mint state gold, but only if properly graded. Nevertheless, all those "pollyannas" who feel the market cannot slow down must feel like the lenses in their "rose colored glasses" are broken. The realists can see a definite slow-down in business. Whether due to a lack of fresh material, or prices having increased to the point where many feel a correction is necessary, or a hesitation on the part of the investors. The overall market has slowed immensely. One has to look no further than the annual FUN Show to encounter evidence of this slow-down.

The FUN Committee put on another tremendous event with a full bourse and crowds that make many shows jealous. They provided big screen TV's for "Bowl Games" and a dinner for the dealers, everything but money for the customers to spend. The market may not lack money to invest, but it does appear that it lacks direction or confidence. Efforts were strong to keep MS-65 type coins stable, but recently, and at the FUN Show, many of the major buyers of type became sellers at discounted levels. MS-65 dollars are stable, mainly because material is not available and there is a major following for this series. MS-63 and 64 dollars are consistent, but lesser grades are a glut on the market. Many original rolls are available at discounted prices and MS-60 singles are quite difficult to sell. U.S. gold has reached a stage where grading has tightened considerably. "Sliders" are difficult to sell as buyers want true mint state coins at these higher levels. In fact, with levels where they are now, buyers have become extremely fussy. Considering this fact, there are very few minus signs this week as most sellers are not discounting their inventories.

The Mid-American Auction was indicative of the show, in general. There were over 450 registered bidders. Although not all in attendance during the sale, the auction room was standing room only most of the time. The overall sale seemed a little weaker than anticipated because of the various issues that have slowed down recently, but silver commemoratives and U.S. gold seemed particularly strong. Overall, the auction was run extremely well and again, was well attended. A few of the auction highlights follows:

Denomination	Grade	Price Realized
1897-S Barber Half	MS-67/67	$ 9,900
1922 Peace Dollar	Matte Pr-65/65	$28,600
1865 $3 Gold	MS-65/65	$23,100
1844-D $5 Gold	MS-63/63	$ 6,600
1935 Connecticut	MS-65/65	$ 1,375
1936 Delaware	MS-65/65	$ 1,430
1918 Lincoln	MS-65/65	$ 935

This Week's Market

CENTS: This week finds BU Lincoln rolls relatively unchanged. It has been a long time since enthusiasm has been felt in this series and there is no indication of this trend changing in the near future.

NICKELS: Although this area does have its moments of activity, BU Jefferson rolls are on very few want lists. When they are needed, it is for specific dates with very limited quantities. Original Buffalo nickels are actively sought at current levels, but are generally not found in large supply.

DIMES: The popular 1938-D & S Mercury dime rolls are once again higher as sufficient quantities cannot be found to fill dealer needs. Other dates continue strong at today's bids.

There are several minus signs this week in the BU Roosevelt dime column. The only noticeable bidders in this area are at bargain-hunting levels.

QUARTERS: BU Washington quarter rolls saw very little action this past week. For most of the BU silver issues, lack of trades may be due to the holidays, but this will be determined over the next few weeks as most dealers get down to serious business.

HALVES: Original rolls of Walking Liberty halves continue to be sought at current levels by several dealers. The problem developing here is, like original dollar rolls, dealers want them "unpicked". Once they have been picked, the value of the roll may drop considerably. Nevertheless, picked or put-together rolls, depending on overall quality, may still bring between $1600 and $2000 for common dates.

A few dates in the Franklin series have dropped as various lots were offered at lower prices. This is another area which is being somewhat ignored for now.

DOLLARS: Once again, Carson City dollars are the only ones experiencing any price changes; only in MS-63 and 64. Some dates are higher as numerous dealers try to fill want lists. MS-65 dollars received strong support at the FUN Show, but supplies were not plentiful.

PROOF SETS and MINT SETS: The lack of price changes is an indication of the slowness of mint sets, but not proof sets. Proof sets have been changing hands consistently within current ranges. Mint sets seem to be rather stagnant.

COMMEMORATIVES: The whole silver commem series is quite active and strong in all grades. There are more and more dealers competing for the limited supplies of low mintage coins at higher levels, while the so-called common issues are wanted at current bids.

TYPE: MS-65 type coins were found to be a little soft at the FUN Show. The high buyers, not only dropped their buy prices, but in many cases, were offering to sell coins at discounted levels. This has resulted in many minus signs this week for proof and MS-65 type coins.

GOLD: As stated in the Market in Depth, U.S. gold was a difficult sell in Florida. Many dealers expressed concern for the value of AU, "slider", and MS-60 coins. Most dealers are treading very carefully until they determine the next directon U.S. gold may take.

FOREIGN GOLD: (Modern & restrikes. Traded in BU condition.)

Bullion related gold coins in this issue are figured on a basis of gold at $329.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY UNCIRCULATED) Will have no trace of wear but may have many bag marks and/or hairlines. Surfaces may be dull or lustrous. Strike may be poor. Eye appeal is below average.

MS-63 (NO FINER UNCIRCULATED) Will have minor bag marks, may show only a slight loss of strike. Should have full lustre. Eye appeal is well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-64 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MARKET SHOWS NEW LIFE AFTER HOLIDAYS

Commems Remain in Spotlight

The Market in Depth

The BU roll market has been quite active this past year, or has it? It really depends on the series. One exercise is unquestionably performed now more than ever before: Cherrypicking rolls. It is now common practice to go through original rolls and pull out the best coins and substitute just average BU coins. If decent coins are put back in the rolls, one may have readily tradeable rolls. If unmatched or slider coins are substituted in the rolls, then one has rolls that will probably be heavily discounted. Cherrypicking is a practice that, not only blossomed in 1985, but became somewhat exaggerated because the values for better graded mint state coins increased, numbers of clients increased for better quality, and supplies continued to run short. This is the biggest reason why original, unpicked rolls of anything, possibly excluding Lincolns and Jeffersons, are very popular, but considerably difficult to find.

This Week's Market

CENTS: BU Lincoln rolls (1934-58) began the year bid at $4277. It ended at $4023. Overall, that is a drop of 6%, but that's not the whole story. There was, and still is, very little interest in this series. Most buyers of BU Lincoln rolls want them only if heavily discounted. The only reason this series did not fall at a greater percentage, is that the dealers with large inventories of these rolls, are not interested in giving the rolls away at large discounts. Current outlook continues to reflect this same attitude by both buyer and seller.

NICKELS: Although BU Buffalo nickel rolls (1934-38) are relatively unchanged for the year (bid $21,050 compared to year-end $21,075), there continues to be strong interest in these if they are original. The main reason prices haven't changed in the 1934-36 rolls is that they are not often encountered. The only rolls that change prices are the 1937-38. Buffalo rolls look to continue strong demand at these levels, if not higher.

Overall, the BU Jefferson series was sluggish all year. Except for a few specific dates and the war nickel series (1984 war nix bid-$2165; 1985-$2310), this series was neglected when not selling at discounted levels. The year began at $6118 bid (1938-64) and ended at $5883. Along with the Lincoln series Jefferson nickels are usually spurred by strong collector interest. Since collectors aren't buying rolls it's left for investors to heat this market up if it's to be.

DIMES: BU Mercury dime rolls (1934-45) started the year with a total bid of $38,930 and ended at $39,770, up a little over 2%. That does not seem like much, but this series was one of the most cherrypicked of all the series. It was consistent throughout the year and ended with more buyers who are looking for MS-65 specimens. The outlook appears favorable.

BU Roosevelt dime rolls, upon reflection, seemed quite active and always strong. But, a comparison of bid shows a net loss of $757, as bid fell from $8407 to $7650 by year end. This is mainly due to the lack of investor interest and the efforts of some dealers to drive prices down. There are very few dealers cherrypicking these rolls as of yet, but, more are beginning.

QUARTERS: BU Washington quarters followed the same path as Roosevelt dimes. It seemed like they were always active, but, when push comes to shove, they had fallen $2121; $18,836 bid as compared to $16,715 for the years 1941-64. The earlier rolls did not move much either way, mainly because they do not appear on the market that often.

HALVES: Original Walking Liberty half dollar rolls (1941-47) showed considerable gain for the year. 1984 started off at $54,475, with the year-end producing bid of $74,450, a gain of 36+%. Dealers continue to demand this series as most are looking for MS-64 and 65 singles. MS-65 singles have also jumped quite a lot to help increase this desirability.

The BU Franklin series did not fare as well. Beginning the year at $16,385 (they were active throughout the year), they began to fall the last quarter and ended at $14,562. A net loss of $1823. One of these days this series is due to show a sizable profit for the year.

DOLLARS: Eisenhower and Susan B. Anthony dollars, both showed an increase in bids for the year. Ike dollars began at $2914 and went to $3518, while SBA dollars started the year at $2632 and finished at $3471, a whopping $839 increase. Both series appear to be on a roll as the new year begins and both are in strong demand. Also, several dealers started grading Ike dollars and it looks like they will be as difficult as Morgans to locate in the higher grades of mint state.

Generally, BU dollar rolls began 1985 in strong demand and continued in an upward direction for over 6 months. In the middle of August, prices began to move downward until they reached a plateau where they remained somewhat stable the last two months of the year. This was truly one of the most active areas of the market in 1985.

PROOF SETS and MINT SETS: These two areas showed very little change from the beginning of the year to the end. Mint sets were considered quiet overall for the year. But proof sets received considerable attention. Prices were up and down, especially for the silver sets from 1950 to 1964. In general, 1950-1956 held much of their profits, while 1957-64 lost a lot of their increases and some even showed lower bids by the end of the year. Of the late-date sets, 1979-S, 80-S, & 81-S did show healthy increases for the year.

COMMEMORATIVES: Exciting! Strong demand. These descriptions characterize silver and gold commemoratives (MS-65) for the entire year. Silver commems gained more collector and dealer support than any time in the past. Although, this may be a "Catch 22", as the bid prices, in MS-65, have gone up so much that many advocates feel they can't go any higher. It must be remembered that most issues have very low mintages (between 5000 & 20,000) and a very small percentage can actually be MS-65 or better. There's no telling where this series can go.

MS-63 is also a very desirable coin and was active, as were grades down to XF/AU. The 144 piece set in MS-65, increased from $72,190 to $133,720. The 11 piece gold set in MS-65 ended the year at $57,175 up from $35,725.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $340.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary

MS-60 (BRILLIANT UNCIRCULATED) May have some bag marks, may show on a slight wear spot or two. Strike should have full detail. These are well above average coins.

MS-63 (CHOICE BRILLIANT UNCIRCULATED) Will have minor bag marks, may show on a slight wear spot or two. Strike should have full detail. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-65 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics at the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65 but with the additional feature of deep mirror prooflike surfeces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck -and virtuelly perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins These usually average MS-63 but may also include some MS-60 and MS-65 exemples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

AUCTIONS DOMINATE UPCOMING WEEK

Properly Graded Morgans - MS63 and Better - Remain Active

The Market in Depth

This past year has seen some dramatic changes in the coin business, not the least of which were the continued expansion of guaranteed buy/sell programs by many companies and the continued growth of telemarketers. As much as most numismatists dislike the idea of telemarketing, one positive cannot be denied, it has brought 1000's of new customers into the coin business. This has meant millions of dollars to our industry. What would be nice is a telemarketing company that sells numismatic educational aids first, but I guess that would disrupt the chronological order of profits first and foremost. It is too bad that the negative press that telemarketing receives also hurts the few companies out there that may be classified as telemarketers, but are also long time numismatic professionals.

A very few telemarketing companies are concerned with educating their clients first. They have been in business for a considerable number of years, they have proven numismatists on their staff and, most importantly, they do have legitimate buy/sell spreads. That is, their business is not just selling coins to their clients; they want to buy them back at a later date. Anyone can buy coins. The difficult task is selling coins and making a profit. If the company selling coins does not offer buy prices or their spreads are too wide, the client can never make a profit. This fact alone is the reason more companies now offer a guaranteed buy/sell program. This relieves the client of a major obstacle in the investment field of numismatics.

The guaranteed buy/sell spread tends to lessen the grading problem for the novice. "THERE IS NO SUBSTITUTE FOR EDUCATION!" "Knowledge is King." If one knows his coins are properly graded, he can sell to almost any reputable dealer. If the client lacks this expertise, it will be necessary for him to deal with someone who will remain in business in the years to come and also offers some method of repurchasing, either verbally or written. As for determining whether a company will remain in business, this is not always possible. But, you wouldn't buy a guranteed air ticket to the moon from "Here Today, Gone Tomorrow Rocket Travel", so why buy coins from a company that doesn't have a sound foundation. Stick with dealers who know the business, who have been around and who will stick around for years to come, and preferably, one that wants to buy coins back at a later date at the same grade they were originally sold.

Auction fever is about to hit California, all within a one week period. Superior Galleries, Bowers and Merena, Inc., and Kagins all have auctions in the Los Angeles area and it will present dealers, investors, and collectors, with an opportunity to participate in a "free" market (included are the NASC and Long Beach Coin Shows) at its best.

This Week's Market

CENTS: Minus signs are scattered throughout BU Lincoln rolls this week. A large lot of various dates has been offered at discounted bids and remains unsold. Most dealers continue to ignore this series.

NICKELS: Dealers constantly attempt to buy original Buffalo nickel rolls at current levels, but trades are few and far between because of a lack of material. The same cannot be said for Jefferson rolls. Activity is slight with BU rolls, but proof rolls are receiving an increasing number of bids at higher levels (1972-S and later).

DIMES: This week finds no changes for BU Mercury dime rolls, although buyers are still anxiously seeking rolls. BU Roosevelt dimes indicate changes only for late-date silver rolls; on the downside.

QUARTERS: BU Washington quarters remain sluggish as actual trades are infrequent. Only one major buyer consistently offers to buy rolls and only at lower levels. As such, there were a handful of dates with minus signs as some rolls were offered at lower levels.

HALVES: Somewhat of a conflict has developed over the bid prices of original Walking Liberty halves. Two strong buyers will take original rolls at current levels. Nevertheless, many other dealers are trading nice rolls at somewhat lower levels and the coins may range from MS-60 to 64. What dealers are expecting in original rolls are a sprinkling of MS-65's. We have seen nice put-together rolls trade for a little less than $2000.

DOLLARS: Carson City dollars, in plastic, out of plastic, are extremely active in MS-60 (1882-84). Higher grades and other dates also receive a share of today's dollar activity. BU dollar rolls remain relatively slow, but not necessarily weak. There is weakness in MS-60's, but, MS-63, MS-64, and MS-65 coins are in constant demand, despite reports to the contrary. Properly graded, MS-63 and above dollars are wanted by numerous dealers. While it is true that borderline or overgraded dollars are not selling, don't be fooled into thinking that your strictly graded coins won't sell. They will.

PROOF SETS and MINT SETS: A few of the silver proof sets increased this week, while others were active at bid. Late-date clad sets were mixed. Early mint sets saw bidders at current levels, while later sets were ignored.

COMMEMORATIVES: Gem commems continue their prolonged climb to new highs. It looks like dealers who felt they were too high 20% ago, might be kicking themselves now as they try to locate MS-65's at new, higher levels.

TYPE and GOLD are a continuation of last week's retrospective of 1985.

TYPE: Circulated type saw very little movement for the year (Good-AU). The only consistent movers (upward) were Dr. Bust quarters (1796) and halves (1796-97). These are truly rare coins which are usually only found in auctions. MS and proof coinage in 60 & 63 also saw very little movement for the year. But, proof and MS-65 coins showed increases for almost everything except copper, which indicated losses primarily due to concerns over erosion of quality over time. Investors and collectors (and dealers) have a strong desire to own the best. Even though MS-63 & 64 are considered nice quality coins, most numismatists are not interested unless the description is 65. Since 65 coins are not plentiful, 63 & 64 specimens could be the big movers of the future.

GOLD: 1985 will be known as the U.S. gold year. U.S. gold matured and then some. It completely broke away from the price of bullion. Despite very little change in the price of gold bullion, the majority of U.S. gold issues prospered. MS-65 gold increased considerably and since they are infrequently encountered, MS-63's followed suit as investors purchased the best available. With the increased interest in U.S. gold, MS-60's also shot up. The many telemarketing companies with their huge advertising campaigns can be thanked for much of this interest.

FOREIGN GDLO: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $353.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly speaking, coins so designated may show evidence of rub or other contact marks, but the degree of such abrasions must be very slight. Coins of good luster and eye appeal. Most coins encountered in trade are of this level.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

You've read about us. . . You know us by reputation. . .

But. . .

Have You Ever Done Business With Us?

For many years—since 1953, in fact—we've been keeping discriminating buyers happy. In the process, by outright sale and by auction, we've supplied our clients with great rarities (1787 Brasher doubloon, 1804 dollar, 1913 Liberty Head nickel, 1822 half eagle, 1870-S $3, etc.—just about every rarity in the book!) as well as untold numbers of key dates, "type" coins, Morgan silver dollars, commemoratives, etc. If anyone has sold more coins to more collectors and dealers than we have, we have yet to learn about it!

But, have YOU bought from us? This is the important question! If not, we invite you to clip the coupon below and send it is us. Do this, and we'll send you our next several catalogues and price lists—a sample "Rare Coin Review" (cover price: $3) and several "Special Coin Letter" issues ($2 each)—a value of $10 or more—ABSOLUTELY FREE! This offer is limited only to Coin Dealer Newsletter readers who have not ordered coins or subscribed to our catalogues during the past two years.

Are you fussy about quality? Do you want the satisfaction of dealing with a firm of unquestioned professional and financial reputation. Do you want to learn of special offers, listings of important coins for sale, and other values? If so, send us the coupon below and we'll do the rest! We look forward to the possibility of having you as a client!

Sincerely,

THOMAS J. BECKER

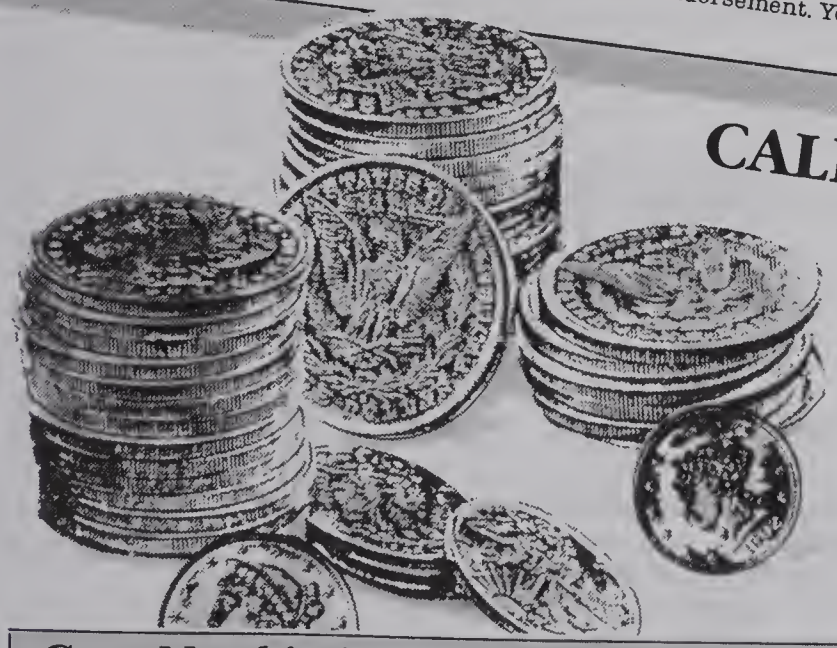
In 1979, four hard money investment advisors' books had a profound effect on the way average Americans invest their money. Today, seven years later, these books are ticking time bombs, ready to explode on the investment world. You need to be prepared.

Dear Friend,

Because of books by Howard Ruff, Doug Casey, John Pugsley, Jerome Smith and others, a special **hair trigger** market situation has developed. It was created as a by-product of their writings. They didn't even do it deliberately. I call it the accidental market. And nobody seems to have recognized it for what it is, or where it's at.

In the bull run of 1980, a handful of newcomers to the rare coin markets blew the roof off of prices. I think it's going to happen again. Only next time, there could be far more new buyers trying to get "on board." **A bull run is a lot more likely next time.** Millions of people know the story, and are waiting to "beat the market," or "get-even with the market."

You need the **Investment Coin Review,** so you're prepared when the markets take off. This is **market** leverage. And you can get it **without debt.**



The big problem with all previous rare coin information newsletter services is that they have been either one-man operations, self-promotion letters for the big coin companies or else hodge-podge magazines not governed by a consistent philosophy of investing. **Investment Coin Review** overcomes both of these problems. I've assembled a **team.** I have laid down the rules for what goes into each report. Every article is governed by a consistent approach, although each specialist is allowed wide latitude to apply this philosophy according to his best judgment.

I track the performance of 12 top coin dealers and list each coin in their portfolios. Several of them currently have over a 100% annualized return. The **Investment Coin Review** will tell you who these men are. And just as important, the **Investment Coin Review** will help you find the coin dealer that's right for you.

I'm not in the coin sales business. I'm in the information business. I'm not going to get into coin sales, either. This is why the best dealers in the industry are willing to write for my **Investment Coin Review. I sell information, not coins.** It's all up front. What you see is what you get. What you pay for is what you get. Information. The best I can assemble. If you win, you'll resubscribe. Then I win. And only then. Read how you can win using the high leverge and zero debt of the rare coin markets.

P.S. I've screened the top coin dealers in the industry, and they want to keep my endorsement. You get my pre-screening of reputable dealers (in addition, my 550 page A - Z introductory manual will tell you how to **use the acid test** to find a dealer that's right for you) and my leverage of literally thousands of coin buyers — not many dealers would risk bad relations with even one of my subscribers because they might lose my endorsement. Your satisfaction is guaranteed!

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 – but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck – and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 – but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

1878-S DOLLAR BRINGS $37,400
Finest Known 1886-O Morgan - $71,500

The Market in Depth

There was excitement in the air. Even Wayne Miller showed up to bid on coins in the Superior Galleries Auction that contained the silver dollar set he once owned. There were at least 300 dealers, collectors and investors in a packed auction room with many buyers hoping to purchase at least one of these rarities for their own collections. But alas, if they were looking for underpriced coins, this was not the session. Most coins brought top dollar and the majority had many bidders from the opening bid to the final hammer. This had to be one of the most active sessions over experienced as numerous lots were jumped 50% to 100% and many lots sold for as much as ten times their opening price.

Two of the liveliest moments occurred when the 1878-S and 1886-O dollars were sold. One of the nations better known numismatists purchased the 1886-O and was the underbidder for the 1878-S. These were two of the most sought after coins in the set. The 1878-S opened at $8000 (graded MS-69+, Gem Cameo P/L; few could argue), quickly gathering momentum as the auctioneer called bids around the room. This so-called common date, in not-so-common condition, had the room buzzing and straining in attempts to see who would pocket this prize. Over $30,000; the underbidder smiled, then one last hand went up in the air to snatch history at $34,000. With the 10% buyer's fee a single 1878-S dollar realized $37,400.

The 1886-O graded MS-69 Cameo P/L by Superior, is the finest known example of this date and until proven wrong it shall remain. Bidding opened at $17,500 and quickly ran to over $50,000. Higher and higher the bidding went until the final hand clinched a fist on the arm of this numismatic humorist; at $65,000 plus the buyer's fee (total $71,500) it is considered a steal by the many who attended and applauded. These were not the only "wonder" coins, an 1895-O, MS-67 brought $71,500, while a deep P/L, 1892-O realized $23,100.

The Branchmint proofs also received active bidding. The 1879-O opened at $15,000 and (including the buyer's fee) realized $41,800. The 1887-O brought $19,800 and the 1893-CC was purchased at $30,800. The total dollar set realized approximately $1,220,533. Other highlights:

Date	Grade	Price Realized
1883-S	MS-67	$18,700
1888-S	MS-65 P/L	$ 4,400
1890-O	MS-65 P/L	$ 3,960
1891-O	MS-67	$14,300
1880	PR-67	$14,850
1881	PR-69	$19,800

The Bowers and Merena Auction opened to a packed room of bidders with a major consignment of 137 Hawaiian commemoratives. These had been in the Bank of Hawaii for over 50 years. Except for yearly inventory handling, most of these coins had not seen the light of day. This occasional handling did cause unusual toning. Most of the MS-63's brought between $1850 and $2250; while the MS-64's sold for $2650 to $3200. A couple of coins of comparable quality did bring over $3500.

This Week's Market

CENTS: BU Lincoln rolls continue to be soft as most dates need to be priced at well under bid in order to sell. When rolls command bid, they are only for limited quantities of specific dates.

NICKELS: The Jefferson series lacks support for the time being. There are very few buyers (with the possible exception of 1953-S) at bid levels, but there are not many sellers either. The war nickel series appears to be soft.

DIMES: Original Mercury dime rolls are once again advancing (1940-1945) as bidders attempt to locate these hard to find unsearched rolls. BU Roosevelt dimes continue sluggish with a few dates lower.

QUARTERS: BU Washington quarter rolls are not getting much attention. What changes are being made, occur downward. The 1949-D and 1950-D, both fell, along with the 1963 & 64 issues.

HALVES: BU Kennedy rolls are beginning to feel some downward pressure as various dates are now being offered at lower levels. Buy prices had been relatively weak, but, until recently, sellers were not anxious to discount their inventories of rolls.

BU Franklin rolls are once again suffering some setbacks, while the majority of Walking Liberty half rolls are wanted at current levels.

DOLLARS: "Please kick me." That's what at least six coin dealers must be saying after attending the San Diego Show last week and having passed on an 1885-CC dollar in a GSA holder. The price was only $1100. One astute dealer purchased it and immediately turned down a $700 profit, only to sell this superb (non-PL) for $2350. It then sold for $2700 and a day later for $3500. It took two more days before selling again (only because it hadn't been shown) at $5000. This happy purchaser vowed to never sell, but I don't think he could resist the profit.

PROOF SETS and MINT SETS: Although bidding was relatively active this past week, changes were kept to a minimum; i.e., most trading occurred within current ranges.

COMMEMORATIVES: There doesn't seem to be any way of slowing down the weekly increases for gem silver commemoratives. Many dealer want lists contain the majority of issues in MS-65. On the other hand, several dealers are also looking for MS-64 thru XF/AU coins.

TYPE: Proof and MS-65 type are still in demand, mostly within bid levels. There is some profit-taking within some series, thus causing a few minus signs. This is not a sign of weakness. There are several buyers at these new levels for properly graded coins.

GOLD: U.S. gold coin prices seem to have solidified over the last ten days. Several dealers are "back in" the market after a temporary lull. The auctions found many coins of every denomination realizing bid or more for properly graded coins (AU thru MS-65).

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $353.90 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-63 [illegible] PROOFLIKE [illegible]

MS-64 No [illegible] sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely better than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-65 PROOFLIKE (PROOF UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides.

Bank financing available on precious metals and numismatics.

Finance any item from our large menu.

No bank offers more flexibility when it comes to lending on a wide variety of precious metal and numismatic products. Take a look at this list:

Strong advances on solid security.

Our advance amounts reflect our belief that precious metals and numismatic properties are among the most liquid collateral in the world.

The following is our current advance guidelines:

80% of spot*1 – precious metals
75% of market bid*2 – U.S. Gold and Silver Dollars
Up to 70% of value*3 – numismatic property
85% of spot*4 – Foreign Currencies

Flexible rates and terms.

We charge floating prime rate on all loans. Added to the amount you borrow from us is a loan fee. The fee covers the cost of storing, insuring and processing your collateral and loan documentation. Generally loans are 6 month renewable term. Other terms available on request.

Dealers and brokers are important to us.

The majority of loans is referred to the bank by coin dealers and brokerage firms. If you are a "cash and carry" business and would like to offer bank financing for your clientele, check with us, we have the program for you.

Do your business with people who know your business.

Joel Gabrelow, Senior Vice President and Mark Albarian, Vice President understand your business. They have a thorough knowledge of numismatics and precious metals. Numismatics can be appraised on the spot – no need for an outside appraiser.

Just pick up the phone.

Whether you're a dealer/broker or an individual, we are here to discuss your needs. Please call (818) 906-9950.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63- -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

TRADING HEAVY FOR COMMEMORATIVES

Collectors Turn Out For Long Beach

The Market in Depth

Auctions and coin shows: Attendance was fantastic. In the past two weeks, in the Los Angeles area, there were three major auctions and two coin shows. Millions of dollars were spent at all five events. The last of the five events, the Long Beach Coin Show, is the best indication of the condition of the rare coin market. This was the best attended show in probably 3 years. Saturday saw the largest one-day crowd in a long time; and many dealers, who usually get an early start for their trip home, remained as activity continued throughout the day.

Most dealers reported having a good Long Beach Show. Although, some dealers did not fare as well, this was due mostly to the fact that they have the same "tired inventory" that they've had for sometime and are not willing to sell it for what it is worth. But those dealers who are active in the market, those that seek want lists, those that work the show from table to table,did have a good show, and in fact, enjoyed a successful two weeks in California.

It is not difficult to see what the most active areas of the market are if one watches and listens. Gem commemoratives are on everyones' want lists (if not, then you are missing a lot of activity). Not everyone pays top dollar, but numerous dealers are paying within the bid/ask ranges or whatever it takes to buy the top quality coins. Next most active are MS-65 dollars, Walkers, and Mercury dimes (non-split). But, it doesn't stop there. Gold is beginning to regain its momentum in all grades, as several market-makers are again buying large quantities. Also, many dealers are buying and selling MS-63 and 64 coins in almost all series. The key factor here is that the coins must be accurately graded and fairly priced. (This is really no different than MS-65 or any other grade for that matter.)

Original Morgan dollar rolls seemed to be very active at current levels, although quantities are somewhat limited. Put-together rolls were also very active at prices commensurate with the quality of the 20 coins within the rolls. Peace dollar rolls are somewhat sluggish with most trading at discounted prices.

The biggest problem at shows anymore is the lack of fresh deals on the floor; past years would usually find a few large collections trading hands and then being broken up among many dealers. Some coins would change hands as many as five times or more. The only exciting deal reported at Long Beach was a set of proof $2½, $5, and $10 Indians. The set changed hands at something over $300,000, and contained many 65 specimens. Lack of fresh material notwithstanding, many dealers are changing their attitudes about the market and approaching this year with more positive outlooks. Sure, there are negatives, but there are ways to make money through hard work and studying areas of the market. It is readily apparent that numerous dealers are marketing MS-63 and 64 coins at today's levels. The primary reason is that it is very difficult to locate MS-65's in many series and prices have risen to levels that many dealers feel more comfortable in MS-63's and 64's.

This Week's Market

CENTS: BU Lincoln rolls are showing no signs of life at current levels. There are very few minus signs only because most dates were ignored this past week.

NICKELS: Common date Buffalo nickels, in MS-65,are beginning to receive constant action at bid levels and higher. This is the main reason that original rolls are active within bid/ask ranges. BU Jefferson nickels did not receive much action this past week.

DIMES: Original rolls of Mercury dimes (1941 thru 45, all mints) are in constant demand at bid and higher levels; all have plus signs this week. Numerous dealers are buying MS-65 specimens at higher levels and finding it difficult to locate large quantities.

BU silver rolls of Roosevelt dimes (1960-1964) have fallen, as dealers are finding these dates difficult to sell.

QUARTERS: BU Washington quarter rolls are no more active than Roosevelt dimes (except 1955-D). The 1959 thru 1964, both mints,are lower this week. One positive note: Dealers seem to be looking for strictly graded MS-65 singles more than in the past (1932-1949).

HALVES: Most BU Franklin rolls, from 1951-59, are substantially lower as various dates have been offered at lower levels. Most dates go unsold. Several dates in the Kennedy series are also lower, along with many proof rolls.

Original Walking Liberty half dollar rolls are very active at current levels. Some selected rolls sold at even higher levels at Long Beach. Gem singles continue strong.

DOLLARS: MS-64 and 65 dollars seem to be receiving the most action lately. Of course, MS-65's are not plentiful, but MS-64's can be found in quantity and are steadily increasing their following. Several dealers will take quantities of most dates.

The 1973-S and 74-S (Brown Ikes) are wanted in large quantities at higher bids. Some of the other dates are also needed, but, at current levels.

PROOF SETS and MINT SETS: The early Franklin proof sets (1950-54) are showing new strength at higher levels. Most later sets receive consistent bidding at current levels. Mint sets remain somewhat quiet and are infrequently offered or sought.

COMMEMORATIVES: Silver commems are about as hot as they can be. Plus signs are scattered all over the MS-65 column. Although, many dealers report strong activity in MS-60, 63, and 64 commems also. One dealer sold over $100,000 in commems (in one day at Long Beach) and he did not sell anything better than MS-64. Most of the MS-64's were sold at prices well over MS-63 ask.

TYPE: Minus signs are restricted to MS-63 and 65 copper coins this week. It is very difficult to sell copper at current levels as many dealers are concerned with the possibility of coins developing carbon spots in the future. Silver type coins (MS-65) were not in abundance this last couple of weeks and the ones available were not discounted from bids.

GOLD: U.S. gold buyers seem to be getting a little fussier as of late. They are still willing to pay within current ranges, but, the borderline coins are not as apt to work. This is much better for the dealers' clients because they will get stricter graded coins that will be easier to resell when time comes to take profits.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $344.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary

MS-63 [illegible] MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

"STARTLING"

DEEP PROOFLIKE CAMEO MIRROR MS 65 1891cc Silver Dollars!

Four bags of 1891cc Silver Dollars were distributed by SDICA in 1984/1985.

For the last 18 months rumors circulated around the bourse floors of
many major conventions that several dealers had seen several P-L 1891cc Dollars
that were "Mind-Altering"...

Although only a small handful of dealers actually saw these dollars
the rumors were laid to rest and the specimens reached the dark recesses
of a bank vault for another year.

We have in our possession the finest 8 specimens of 1891cc Silver Dollars painstakingly
cherrypicked from 4 original bags of 1891cc Morgan Dollars.

These are NOT for the average collector. These coins are, in our opinion,
"a once in a lifetime opportunity".

These specimens leave all 1891cc competitors a distant second. They are by far, the finest,
incredible coins of this date I have ever seen, and surely, ever will see.

Startling, Incredible, Deep Cameo P-L mirror surfaces give each and every specimen
the aura of a Branch Mint Proof, rather than a regular business strike.

And finally, the MS 65 grade earmarks each and every specimen as an "Heirloom".

The few coins we possess will surely be dissolved
into the market quickly and probably never seen again.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 -but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER 6) Will be 100% fully struck ...and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

MS-63 COMMEMS MAKING STRONG MOVE

Eye Appeal Coins - Easy Sellers

The Market in Depth

With the Mid-Winter ANA Convention just around the corner, not only are various areas of the market (in MS-63, 64, & 65) heating up, but a number of new organizations are venturing upon the scene in an attempt to give the coin industry a stock market appeal. Can this be done? Will it be accepted? Time will tell. Anything that helps guarantee grading and pricing will be a step toward improving the credibility of the coin industry. This is a belief which is strongly backed by investor interests. On the other hand, there remains, no substitute for educating oneself. This belief is adamantly supported by collectors, dealers, and the ANA. Moreover, if you, as a dealer, will not help the customer in his (her) quest for education, then, that customer is likely to go elsewhere.

The ANA Convention runs February 20-22, in Salt Lake City, Utah. There will be several educational seminars and roundtable discussions, which aid in advanced education. With attendance on the increase, at most coins shows this year, there is no reason to think that this should be any different. Hundreds of dealers will be on hand, armed---with want lists of coins they feel will be the most beneficial for their customers this year. Heritage Numismatic Auctions, Inc., will conduct a 3000 lot auction containing about 600 U.S. gold lots, early type, dollars, and commemoratives, among many others.

Over the past few weeks, we have seen some extraordinarily high prices recorded for various silver dollar rarities (?) in auctions and on bourse floors. If these coins are accurately graded, what do these high prices actually mean? When coins can actually be viewed by many dealers at auctions or coin shows, and prices realized go much beyond bid levels, this can be seen as an indication of the individual coins true desireability (or rarity). But, it does not mean all coins of this date and grade are worth the price realized for a particular coin. First of all, competition breeds more competition and in some cases, higher prices. This was definitely the situation for many of the Wayne Miller silver dollars. Many bidders were vying for the so-called common date dollars, thus causing prices far in excess of bid. So, a coin's pedigree can have a marked influence on its value.

Secondly, each and every coin stands on its own merits. There are no two coins that look exactly alike. Yes, one can offer buy prices for a group of coins, but, that doesn't mean that every coin sent to that buyer will meet that buyer's grading criteria. The coins that "make it" for each and every buyer (grading expert) must have a particular "look" that satisfies his expertise, so that he is comfortable in his sales approach to his customers. Needless to say, each dealer's grading may be different from the next. (At least, for the time being.)

Lastly, each and every coin commands a value, based not only on its numerical grade, but on EYE APPEAL!!! This is never so apparent as on coins graded 65 and better.

This Week's Market

CENTS: Again this week, BU Lincoln rolls were less than active. Reporting this area of the coin business is very repetitious, but, this nonchalant attitude is exhibited by many dealers across the country.

NICKELS: This week's Monthly Summary indicates numerous plus signs for MS-65 Buffalo nickels. Many dealers are recommending this series to their customers.

BU warnickel rolls are somewhat unstable at this time. Most bidders are below bid to bid (except 1942-S at a higher $310). Two dates are lower this week: 1943-P and 1944-S.

DIMES: MS-65 Mercury dimes (non-split) are generally higher on the Monthly Summary as dealers compete for this previously ignored series. Original rolls are persistently sought at current levels.

BU Roosevelt dimes are not faring as well lately, especially for some specific dates, as dealers try to sell unwanted rolls. Minus signs are limited to a handful of dates.

QUARTERS: BU Washington quarter rolls are seemingly unpopular at this time and several dates are found to be offered for sale at discounted levels; some remain unsold. This change of popularity has made it difficult to sell the common date rolls, 1956 to 1964.

HALVES: Most issues of Gem Walking Liberty half dollars (1934-47) are receiving stronger bidding. This is a very popular series.

BU Franklin rolls remain unchanged, while a few of the Kennedy rolls are lower.

DOLLARS: Carson City dollars are extremely active in MS-60 grade. Transactions are monitored on a daily basis at higher levels. But, there is one catch: Bidders want the coins in the original GSA holders. Buyers have been offering $112-$117 per.

MS-64 dollars are receiving a marked increased in bidding activity. Several dealers will buy quantities of all common dates; most at higher levels. The spreads between MS-64 & 65 are very wide, yet, MS-64, although more plentiful, is a very desireable coin, just a mark or two away from MS-65.

Roll sets of Ike dollars are now up to $3200 bid as the 1973 & 74 silver proofs lead the increase, up to $63 and $19.50 respectively.

PROOF SETS and MINT SETS: Silver proof sets (1961-64) are higher as some dealers try to stock up at bid, while a few will pay over bid. Late-date sets are mixed with more dates lower than higher. The only change in mint sets is the 1981 at a lower $10.75.

COMMEMORATIVES: MS-63 silver commems are making a strong move as numerous dealers attempt to buy many of the issues at higher levels. The MS-64 market is also being actively pursued. The 1982-D & S Washington commems are lower as the high buyers have filled their orders.

TYPE: Early copper is once again showing weakness in MS-63 & 65. Silver type appears to be solid at current levels. Some dealers are beginning to show an attraction for clean XF and AU Bust and Seated halves, and Seated and Trade dollars. No problem coins is the main criteria.

GOLD: VF thru AU gold ($10 & $20) seems to be slipping, as are MS-60 $20 Libs & Sts. On the other hand, MS-64 $5's & $10's are very healthy at higher levels. A quote from a major dealer applies to all grades (even non-gold coins), "Wanted: Full solid grade, I can sell customer and look him in the face 5 years from now".

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $338.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Will have many bag marks; may show only a slight weakness of strike. Should have full luster. Coin are well above average coins.

MS-63 (UNCIRCULATED) Will have many bag marks; may show only a slight weakness of strike. Should have full luster. Coin are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

BUYING MS65 SILVER DOLLARS

WE WILL PAY A MINIMUM OF $500 FOR ANY PROPERLY GRADED GEM UNC. (MS65) MORGAN OR PEACE DOLLAR. WE NEED TO BUY AT LEAST $1,000,000.00 WORTH OF GEM QUALITY SILVER DOLLARS EVERY MONTH. PLEASE SHIP YOUR COINS TO US WITH YOUR ASKING PRICE. AND PLEASE DON'T WASTE YOUR TIME AND OURS BY SENDING OVERGRADED COINS.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereceristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtuelly perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They renge from very scarce to unknown according to dete.

Prices for single BU sets in this chert ere for "typicel" coins. These usuelly everege MS-63--but may elso include some MS-60 end MS-65 exemples. For strictly greded MS-65 single sets, use prices for individual issues es listed in the Monthly Summary. Prices for 6U roll sets in this chert ere for typicel originel rolls of each dete end mint mark

SILVER COMMEMS ADVANCE SHARPLY

Mercury Dimes Increasing in Popularity

The Market in Depth

The last seven years have brought a new breed into the coin industry. While the business used to be made up of dealers and collectors (true lovers of numismatics), the new breed of investor has spurred prices to levels that must have B. Max Mehl rolling over in his grave.

The "old guard" finds prices almost unbelievable (especially for coins which they felt to be nothing more than common, cheap coins just a few short years ago; remembering, they think, that large quantities existed which were of super quality), while the "new revolutionary" finds high prices second-nature. Even somewhat, cheap, if you will. But, are these current high prices unrealistic? Probably not. Higher prices for rare coins are probably no different than higher prices for cars, homes, food, clothing, paintings, education, etc., etc., but, the latter categories gained in value over the last 20-30 years. Rare coins are just catching up, but in a much shorter time frame. Most of this catching up is due to the fact that the number of numismatists used to be measured in the hundreds, then thousands. Now, with the inclusion of investors, the numbers are into the hundreds of thousands, maybe even million (s).

The "old guard" fears the possibility of prices rising, then falling tremendously. Maybe this is a possibility. But, are they as concerned about their homes that increased in value from $50,000 to $250,000 over a few years? No, because people need to live somewhere and their desire to own that home outweighs the number of homes available. The old supply demand theory at work at its best. If the supply of coins becomes so large that demand cannot or will not absorb it, then prices can and will come down; this does happen in an open free market occasionally and it should.

Nevertheless, the number of available rare coins is fixed by the total mintages, less those put away in collections,those melted, and those lost through natural attrition. The number of rare coin buyers expands everyday, thus, creating higher prices, less material. (The desire to own the best and dealers highly recommending MS-65 coins over the last several years are the two main reasons why 65's have increased in value to the degree they are today. It also follows that high prices and a lack of material are swaying dealers' recommendations toward MS-63 & 64 coins as 65's become more difficult to locate.)

So, where do we go from here? Onward, upward? If the "old guard" feels prices are too high in a particular series, they can recommend that their customers sell those coins and buy into other underpriced areas. If the high priced material is overpriced, then the "new guard" will not recommend these coins to their customers and prices would have to fall. Conclude what you will. This industry is made up of buyers and sellers, conservatives and liberals, collectors and profit-takers, and, oh yes, those that also take losses. All of these groups and many more,make up, not only the coin business, but all businesses. How can one avoid losses? The answer is to minimize losses and maximize profits---through perpetual education. Show me a know-it-all; and I'll show you a person that will be taken advantage of.

This Week's Market

CENTS: Proof rolls of Lincolns (1977-S, 78-S, & 84-S bid higher) are seeing an increase in activity. Inasmuch as, the earlier BU rolls continue to rest, the proof rolls are the only bright spots. Most bidding of BU rolls takes place at discounted levels.

NICKELS: BU Buffalo and Jefferson nickels found no changes in bid prices this week. There is very little interest in Jeffersons, while the 1934-38 Buffalo rolls are in constant demand in the bid/ask ranges.

DIMES: As one can see in the February Monthly Summary, MS-65 Mercury dimes are challenging the most active areas of the market. As of yet, the number of dealers buying this series would not be considered large, but, there are more dealers joining the buying ranks every week. Currently, Mercury dime rolls (original) remain in strong demand, with several dates higher this week. Considering what has happened to original rolls of Walking Liberty halves and Morgan dollars (being picked for MS-65's), original Mercury dime rolls might be a bargain at today's levels.

QUARTERS: There is a long run of minus signs this week for BU Washington quarters rolls. Across the board, the majority of dates are not getting any support at current bids, while several dates are found to be available at discounted prices. How much lower dealers will let some dates go is anybody's guess, but some dates do appear reasonable.

HALVES: BU Franklin rolls may not be all that active, but BU sets are wanted by any number of dealers at this time. Some specify better than average sets at higher levels, while others just want strictly BU coins, no sliders.

DOLLARS: High grade dollars are once again on the move. MS-64 & 65, along with MS-65 P/L dollars indicate a long run of plus signs. The MS-65's, especially the better dates, are not very plentiful, but, dealers should be able to stock up on MS-64's at these higher levels. Of course, "sellers usually want more than the higher buyers are bidding in a warming market".

BU roll sets of Ike dollars are now up to $3400 bid,still a far cry from their $7900 high of a few years ago. The 1973-S 40% silver is now bid at a higher $64.

PROOF SETS and MINT SETS: Silver proof sets are very solid at current levels with the 1950-53 & 1961-64 sets even higher.

COMMEMORATIVES: One would have thought that silver commems were hot last year, but after only 8 weeks of this new year it is apparent that last year may have been a mere warming trend. MS-63 and 65 bids are higher for numerous issues and the as of yet, unreported MS-64's are receiving very consistent bidding by several dealers. As with any other series, there are a lot of numbers between an MS-63 bid at $100 and an MS-65 bid at $1200.

TYPE: Type coins appear to be ignored by the majority of dealers at this time. But, the lack of price increases can be deceiving. Many dealers feel this is the time to pick up those strictly graded coins (in all grades) that have eye appeal. When a series appears stagnant, astute dealers look for bargains.

GOLD: Price changes for U.S. gold are minimal, but activity remains strong for strictly graded coins. This is especially important for mint state gold as dealers attempt to place material in the hands of customers who will eventually want to take profits by selling back to the dealer.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $337.10 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

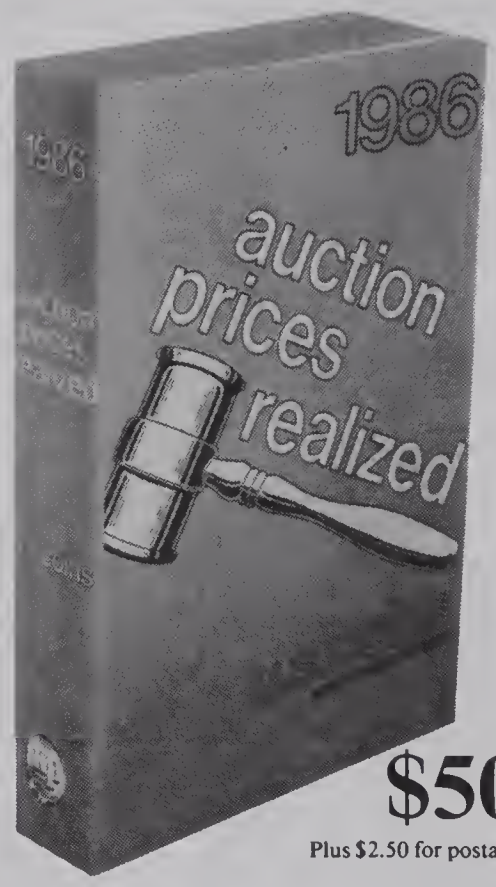
MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor (heavy contact marks. Definitely better than an MS-61. Must have eye appeal.



MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

ANNUAL INVENTORY CLEARANCE SALE

The following listed coins represent an accumulation over the past few months of coins from just about every source imaginable. Of course, as many of you are already aware, we do purchase an inordinately large amount of collections and estates during the year, as well as buying up the stock from various dealers that are going out of business of retiring and wanting to clear all of the inventory out of their vaults. Some of these coins have ANACS certificates and will be denoted by a single asterisk (*) — Some of them have certificates from NCI and will be denoted by a double asterisk (**) and the rest are graded by me.

Some of these grades we agree with AND some of them we do not. However, ALL COINS WILL BE PRICED AT LEVELS THAT WE FEEL ARE ACCURATE GAUGES OF THE TRUE VALUE OF THE COIN INVOLVED. REGARDLESS OF WHAT GRADE THE CERTIFICATE HAS ON IT.

All of these coins are priced at realistic, current day market values that will enable you as an investor or collector to add to your portfolio that coin or coins that you have been wanting at a really good bargain price, as we want to clear some of our stock boxes out before it is necessary to take the end of the year inventory. GET OUT YOUR GREYSHEETS AND PICK UP THE TELEPHONE.

Mid-American Rare Coin Auctions, Inc.

proudly announces . . .

The G.N.A. SALE!

For the THIRD CONSECUTIVE YEAR, Mid-American Rare Coin Auctions, Inc. will be conducting the auction at the always-active and ever-popular Georgia Numismatic Association Convention from May 23-25. The site for this year's convention and auction will again be the Exquisite Five-Star Waverly Hotel in Atlanta. Last year's auction saw more than 400 floor bidders compete for nearly TWO AND ONE-HALF MILLION DOLLARS worth of rare coins which were sold in our memorable Dr. Jasper L. Robertson Sale!

We invite you to call us right now if you would like your rare coins to receive the "Maximum Exposure" Mid-American's Auctions are famous for! We have one of the most responsive lists of customers in the rare coin business who are always looking to pay "what-it- takes" for quality coins. Participating in our last three sales were an average of 350 mail bidders plus nearly 400 floor bidders!

ALREADY CONSIGNED!
1889 Select Proof $3 Gold Piece

Our friendly and expert auction staff is ready to assist you with your consignment. We can offer you exceptionally LOW COMMISSION RATES and CASH ADVANCES if desired. As always, you can expect a magnificent catalogue with extensive, detailed descriptions and hundreds of quality photographs! Already consigned to the 1986 G.N.A. Sale is a large offering of quality U.S. Gold and Silver Dollars. With the consignment deadline rapidly approaching, we urge you to call us TODAY if you wish your coins to be included in this great sale.

Call us! Write Us! The consignment deadline is March 1. This is one sale you won't want to miss! Catalogues will be available approximately April 20.

MS 65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ...and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63- -but may also include some MS 60 and MS 65 examples. For strictly graded MS 65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices ere for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

Dealers Extremely Active in Their Specialties

The Market in Depth

According to several dealers, there is a vast amount of "new" money in the hands of clients just waiting to buy rare coins. What's the problem? Why waiting? The answer is simple: Direction. Most dealers and investors are attempting to determine which areas of the market are primed for the biggest increases over the next few years. Sure, it's somewhat easy to recommend an 1893-S dollar in MS-65 or MS-64 for that matter. But, how many coins in these grades are available? This is an extreme. Nevertheless, this example points out the problems present in today's market. The many areas that appear strong today (MS-65 dollars, walkers, mercs, commems, gold, and MS-64 dollars, commems, and gold), probably have great potential. Even type coins in MS-64 and 65 at today's levels may not be such a bad deal. The problem in this area is that a few dealers have forced this market down, which causes some dealers and investors to feel this market is weak. Such is not necessarily the case. As with the other previously mentioned series, there is not enough material to satisfy all the demands. This is why the market lacks direction: Dealers can recommend this material all day long, but, if they cannot buy enough of it to satisfy their clients, then prices will tend to move upward with very few clients being able to participate in the profits. The dealers' recommendations look good on paper and the investors who acted first may make good profits, but this lack of material means those clients who wait too long will only be saying, "I wish I would have bought coins earlier" (properly graded, of course).

There are an awful lot of dealers across the country who are buying strictly graded coins and selling them to their clients. The three strongest areas at Mid-winter ANA were commems, dollars, and mercs; all in gem condition. Even though we saw many coins change hands which fall into the MS-65 category, these were still just a small percentage of the coins necessary to satisfy the needs of many dealers' secret customers. Although supplies were limited, at least there was sufficient material for the active buyers to put a little smile on their faces.

Speaking of smiling, the ANA Convention Committee must be grinning from ear-to-ear. Despite the inconvenience of the holding laws which may have kept some dealers away, the Convention Committee put on a show that would take a backseat to no other. They drew large crowds of collectors, who despite the "tire-kicker" labels put on them by some dealers, were spending money on collector coins with other dealers. There was more evidence of the collector in the market at the Heritage Auction, as collectors continually outbid dealers for early type rarities (especially, graded Bust dollars and halves). Granted, many collectors do not spend as much money as investors or other dealers, it was encouraging to see such a large turnout of numismatists who wish to learn more about the coin industry. Moreover, at least there are still a large number of dealers who will take the time to help and educate the novice collector. These are the dealers who try to give something back to the industry.

This Week's Market

CENTS: Several BU Lincoln rolls suffered setbacks this week as support at any level is hard to find. The 1960-P sm dt roll is higher at $75, along with the 1970-S sm dt roll.

NICKELS: The 1944-P and 45-D rolls are both lower in BU, while dealers choose to ignore the rest of the Jefferson series. The Buffalo series remains consistent with buy prices monitored at bid or higher depending on degrees of quality in the rolls.

DIMES: After attending the ANA Convention most dealers now realize that Mercury dimes are on the "most wanted list". Original rolls and MS-65 singles are as easy to sell as properly graded commems. Several dealers have want lists for many dates and there are no limits on quantities.

QUARTERS: BU Washington quarter rolls appeared to have stabilized somewhat this past week. Although efforts to drive prices down have succeeded in the past few weeks, the ANA found most dates wanted at or near current bids. The lone price change this week occurred with the 1954-S roll, at a lower $130 bid.

HALVES: Original Walking Liberty half dollar rolls are stable at current levels, but are not easy to locate. There have been some awfully nice put-together rolls available at prices commensurate with quality which are usually below roll bids. Gem singles are very popular with dealers and their clients; most pieces find new homes at ask or more.

DOLLARS: MS-65 Morgan dollars were very active at the ANA. Buyers were everywhere, although quantities were still limited. For gem quality coins, this is a seller's market. In fact, supplies are so thin that sellers offered coins around the floor by taking bids. As usual, highest bidder takes home the prize. Unlike six months ago, when some dealers complained about the lack of MS-65 buyers at higher levels, now many complain about the current drought of gem-quality coins. Price is definitely not the problem.

PROOF SETS and MINT SETS: Proof sets from 1936 to 1964 are quite firm at this point with many years even higher. The 1950-52, 56-58, and 61-64 are all wanted at higher levels. With all the sets that have been broken up over the last couple of years, mostly for the Franklin half, it now appears that these sets have a base from which to work. As with all other series, cherry-picking reduces the numbers of original sets available.

COMMEMORATIVES: The ANA produced a lot of action in silver commems. The top commem dealers just keep on buying and selling MS-63, 64, and 65 coins, with many issues at higher levels. One noted sale: An MS-67 (or better) Hudson brought $7000 and a smile to the face of a happy buyer. This coin had plenty of eye appeal.

TYPE: Type coins seemed to have stabilized at current levels. There is not enough material available, which is both properly graded and fairly priced for the grade. Undergraded or underpriced get snapped up immediately.

GOLD: As loose as grading was for XF - MS-60 U.S. gold the past 3 or 4 months, it has tightened markedly the last 4 weeks. No longer are the big market-makers buying large quantities of anything close. Now, they are cherrypicking and taking only what they absolutely need. The only reason some of these issues have not fallen as of yet, is because most of the dealers holding the "bag" are not yet ready to take losses.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $348.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (Very Choice About Uncirculated) Strictly worn uncirculated specimens of both sides showing an absence of both wear on the highest parts of the design and contact marks on the flat surfaces. Will have many bag marks, may show rainbow toning, and will be struck from worn dies.

MS-63 (CHOICE BRILLIANT UNCIRCULATED) Will have many bag marks, may show rainbow toning, and will be struck from worn dies.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely better than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appealing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

OWN A PIECE OF THE STOCKPILE

Silver auctioned from America's Strategic Stockpile is now available to the public.

Certified .999 fine silver—formerly stored at the U.S. Assay Offices in San Francisco and New York, has been used to produce these handsome one, ten and one hundred troy ounce units. It's your chance to own part of the vanishing U.S. Strategic Silver Stockpile, at no more than you would pay for just any silver. One thousand ounce minimum order please.

Bank financing available.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

DEALERS CONTINUE TO SUPPORT COMMEMS

Original Dollar Rolls and Bags in Demand

The Market in Depth

For several months now silver commems have been registering steady gains. The current buying is primarily being done by any number of dealers---major, as well as independent dealers. So far, price advances have not been limited to any specific issues. In fact, even the Booker T. Washington and Washington-Carver sets are participating in this run. Many of the commems being purchased by these dealers are being put away by their investors, who feel, despite the major advances of last year, that long term investment potential is still tremendous. And now that prices have increased to the current levels, small groups of otherwise put away gems again see the light of day. Demand still overshadows supply for gems and even near-gems. Throw in the limited mintages and one can see why investors and dealers become excited while enjoying commems.

It is obvious, that current buyers are quite quality-conscious when buying coins for long-term investment. But, they are not looking for perfection. On the other hand, the coins must exhibit that ever present "eye appeal". This term is not over used. It is the one term that rationalizes the amount paid for a particular coin. It explains why a coin costs what it does when one hears of a sale but doesn't see the coin. It fully helps one understand why someone (investor-COLLECTOR) would pay $7000 for a Hudson. By the way, many numismatists are concerned that there is a lack of collector business. This is not so. The people who pay multiples of bid for certain coins are not just investors; these are collectors. Collectors understand why a particular coin commands more than bid. Most investors only understand bid. To go beyond this level, one must have searched and studied the realities of rarity or eye appeal. This makes one a collector. But, this does not mean a collector does not want to make a profit. He collects for the love of numismatics. Yet, he profits by his prudence and his thoroughness of research. If this theory seems incorrect, just look around at the ever-increasing numbers of sales of superb quality coins; compare the prices at which these coins sell and you will find that they do not relate to any bid level. Moreover, dealers or collectors cannot put a standard price on an MS-67 or better coin because they never know what they will pay until the opportunity presents itself.

One interesting fact has developed over the past five years: One does not find bidders for 50 piece or 144 piece sets anymore. The bids for the sets in respective grades are the total bids of the individual coins. The reason for this is twofold: One, complete sets rarely trade hands anymore. Two, even if a set were to sell, it is highly unlikely that it would be graded all the same. There are just too many coins to be able to complete a uniform set.

The individual PDS sets are even more difficult to locate in a consistent grade, even if they are original. This is one of the reasons why common issues have performed so well in relation to the better or rarer issues. This leads us back to the collector who studies these facts and is the primary purchaser of the better dates as he feels that some day the better issues will outperform the common issues by two or three times.

This Week's Market

CENTS: BU Lincoln rolls remain stagnant. There is no excitement. If markets were measured by intensity, this series would roll up in a ball and seek a hiding place somewhere in the "dark ages".

NICKELS: BU Jefferson nickels do not receive much more attention than Lincoln cents. On the other hand, there is an occasional buyer for a limited number of rolls of specific dates. This is especially true of the war nickel series. The 1938-D roll is wanted at a higher $115 bid this week.

DIMES: Original Mercury dime rolls remain quite strong at current levels. Many buyers are willing to pay more than bid based on the quality of the rolls.

A few Roosevelt dime rolls have fallen again this week. The 1955-D & S rolls are once again lower as several dealers offer these rolls under bid.

QUARTERS: Gem Washington quarters appear to be rising in popularity as the number of buyers is on the increase. As stated many times in the past, MS-65 specimens are difficult to locate because this series exhibits a tendency to reveal tiny pinpoint marks. Coins, free of these marks, are truly few and far between.

The 1954-D & S BU rolls are lower this week, while the rest of this series continues stable.

HALVES: BU Franklin rolls are steady at current levels, while Kennedy rolls still show a few minus signs. The 1970-D roll is now down to $300 bid. The 1983-D is now bid at a higher $15 with some buyers even higher for limited quantities.

DOLLARS: MS-65 dollars continue to reveal plus signs, mostly for the so-called common dates. This is somewhat of a misnomer as true MS-65's can no longer be called common; there may be some more readily available than others, such as the 'S' mints (1879-82), but at $540 minimum bid, they are obviously not falling off of apple trees.

Original dollar rolls seem to be firming up as is evidenced by the fact that many more dealers are now in the market for bags of dollars. It looks like it's just a matter of time before some of the big marketing houses begin to push BU dollars again.

PROOF SETS and MINT SETS: Dealers continue to pursue proof sets from 1936 to 1964. Bids range from a little under bid to over ask. Quality determines price as under-bid buyers will accept off-quality, while over-bid buyers are looking for near perfect silver coins in the sets. With the earlier proof sets (1936, 37), the Buffalo nickels must also be nice.

COMMEMORATIVES: A whole rash of plus signs appears in the MS-65 column this week. This is consistent with the fact that dealers cannot locate enough material to complete want lists. Most of the PDS sets are just not around in MS-65; when an occasional set does appear, it is quickly sold at or above current levels.

TYPE: MS-63 type is mixed this week with more action being noted in Standing Liberty quarters. Type II coins, full head or non, are tough to find in strict 63 condition. This is another series where grading disagreements occur.

GOLD: Minus signs jot the gold chart this week as sellers begin moving some of their overpriced material. This is the case for MS-60 and lower grades. MS-63 and better remains stable at current levels.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $338.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely better than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

"YOUR NEWSLETTER IS JUST GOSSIP. I DON'T WANT THIS!"

That's one man's opinion of a recent issue of the Bruce Amspacher Investment Report. I thought a few** other **opinions might interest you, too.

"Is there some way you could make the BAIR a weekly? Ten times a year just isn't enough! I love it."
—A well-known Washington dealer

***"We think your newsletter is the best because it's really** fun."*
—An Arizona collector/investor

"Your newsletter has more solid information and less hype in it than any of the others. I should know, because I subscribe to them *all*."
—A California dealer

"I find the BAIR to be both informative and extremely well written. You are a quite literate fellow."
—An Illinois investor

"The BAIR is great! Bruce Amspacher is one of the sharpest coin minds in the country. He is also one of the best writers in the coin industry. I urge you to give Bruce a try."
—David Hall

"I highly recommend the BAIR. Written by one of the great minds in the business."
—Robert G. Allen
author of "Creating Wealth"

"I have found the BAIR to be truly informative, interesting, and enjoyable."
—A California collector

"I told my employee that if he took the BAIR home again before I had a chance to read it, he'd be out on the street. So what happened? My** dad **took the next two issues before I got to read them. I give up!"
—An Oklahoma dealer

"Your ability to pick winners in the numismatic marketplace is absolutely amazing. My husband and I have subscribed since the first issue and we wouldn't be without your publication."
—A Georgia investor

"We got tired of fighting over the BAIR and decided to order two subscriptions. It's worth it."
—A California dealer

"We take two subscriptions in order to keep peace when the BAIR arrives. I'll bet no one else is that crazy or extravagant."
—An Ohio investor

"Bruce Amspacher [is the] finest of newsletter writers."
—David Ganz
Coin Market Insider's Report

"When the BAIR arrives, everything else in the office *stops.* **It's funny, informative, and extremely well written. You are without question the best numismatic writer around."**
—A New Hampshire dealer

"This is a little note to express my satisfaction with the scholarly presentation [of your publication]. There are many besides me that take our hats off to a pro."
—An Ohio collector

"I continue to enjoy each issue as it arrives."
—Q. David Bowers

"I'll vote for the BAIR as the best on the market. I have learned more about coins through you than I did on my own in the 20+ years prior to your acquaintance."
—A Virginia collector/investor

"It's incredibly innovative, clever, and well written."
—A Louisiana dealer

Is the BAIR *really* that good? There's a *good chance* you'll think so. If you'd like a sample copy, just write or call 1-800-821-3985.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63-- but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

MS-64 MORGAN AND PEACE DOLLARS ADVANCE

Has Ike Bubble Burst?

The Market in Depth

The price rise for Mercury dimes, which began a few months ago, is really gathering steam. Every issue from 1934-45, all mints, are in strong demand. Rolls are sought after by a large number of dealers, and the number of singles buyers are catching up rapidly. Most dealers are willing to buy quantities, large or small, which fit the bill. Even the early dates (1916-1931) seem to be participating in this enthusiastic demand for solid MS-65 coins. This, in spite of the fact that the early dates are listed on the "endangered species" list. Even though some dealers are willing to pay over bid for strict MS-65 coins, they are not able to buy many.

When looking through dealers boxes of new purchases, most of the dimes you see are 1940-45. There are occasional 1934-39 coins, but there is a noted absence of earlier dates. This same scenario seems to hold up for Walking Liberty half dollars. Gems are found and traded at current levels for 1940-47. But, 1934 thru 1939 are less likely to be found, while 1916 to 1933, will trade immediately when buyer and seller can agree on their MS-65 status. (These dates are few and far between.)

At this point in time, buyers of original rolls of Mercury dimes and Walking Liberty halves expect a certain amount of MS-65 coins to be found in each roll. In rolls of Lincoln cents, Jefferson nickels, Roosevelt dimes, Washington quarters, and Franklin halves, this should also be the case. Franklins probably have the lowest percentage of MS-65's per roll of this last group. But, what of Walkers and Mercs? Will they go the way of dollar rolls? In the past, one could expect to find MS-65 coins in an original bag of dollars. Then, once in awhile, those bags would be broke down into rolls, where an occasional single or two would grade 65. But, that was the "old days". Now, MS-65's have risen to a level where rolls are cherrypicked of not only 65's, but also 64's and in many cases, 63's. So, what we have are original rolls from bags that only grade MS-60 to maybe MS-63. In many cases, the coins must be evaluated individually and added up to determine the value of the roll.

Well, MS-65 Walkers have already increased in value on a comparable level with dollars. Now, we are finding nice put-together rolls of Walkers that sell for under bid because the anticipated 65's have been removed. How long will it be before the 64's are removed? Already, the split band, MS-65's are removed from Mercury dime rolls. How long before just the 65's are cherrypicked? When 65's start going up. Well, it's here now. MS-65 Mercs are going up; and rolls are being cherrypicked. The next question is, what about Lincolns and Jeffersons?

The Eisenhower dollar series has been stronger of late mostly due to the increased demand for the 40% silver issues---both BU and proof. Although a number of dealers are now taking advantage of these increased bid levels, many are keeping their sell prices just above current bid levels. (Recent exceptions are 1972-S, 73-S, and 74-S silver proofs; currently being offered at lower prices.) Most of the Ikes being offered are small mixed lots. These lots do not always sell as quickly as they might if they consisted only of the specific issues which are of particular interest. The two or three major buyers have stopped their bidding for the Browns, but are continuously seeking the Blues at current levels. Roll sets are now bid at $3800, a far cry from the market high of $7900 just a few years ago. To again attain this level, several different marketing houses would have to make a concerted buying effort of all dates within this series. Even then, they might only hope to approach the all time highs.

This Week's Market

CENTS: Minus signs run up and down the column of BU Lincoln rolls. Most of the dates from 1934 to 1955 have lower bids this week. It appears that some dealers are tired of holding dead material and are trying to move it. Whether or not the rolls actually change hands or not may be determined at a later time, but the fact remains that they are offered at discounted levels.

NICKELS: BU Jefferson rolls are seeing more activity of late, nonetheless, it is of a negative nature. Most activity is recorded at discounted prices, or at best, at bid. Higher bids do not seem necessary. Even if a buyer needs material, there are enough sellers of most dates to satisfy the limited demand.

DIMES: Original rolls of Mercury dimes continue to interest dealers. The 1941-45, 'P' mints (yes, that's correct, even the 1945-P roll) were the target of higher bidders this week. The 1941-P, 42-P, and 43-P are now bid $700 per roll; the 44-P, $685; and the 45-P, $575.

QUARTERS: Early BU Washington quarter rolls have constant bidders at current levels, although several late dates, 1956-1959, are lower this week. The proof 1964 roll is now bid at a lower $82.

HALVES: For the most part, BU Franklin rolls are stable. The few exceptions are noted at lower bids: 1954-S, 59-D, 63-P & D. Despite the efforts of a few dealers attempting to drive rolls down, this series is holding up pretty well. Most trading takes place within 5% of bid to bid. Moreover, it is difficult for dealers to drive prices down unless they have some inventory of specific dates that they are willing to sell under bid.

DOLLARS: It looks like dealers are more serious about MS-64 dollars these days. Whether they think someone will accidentially sell MS-65's to them or not, it looks like competition is getting hot and heavy. Higher prices appear along this column. As for being lucky, very few, if any MS-65's get sold at MS-64 levels without being offered to the MS-65 higher buyers first.

PROOF SETS and MINT SETS: Silver proof sets from 1936-64 continue very active at current levels. Mint sets, on the other hand, are somewhat sluggish with 1959 thru 1963 now showing lower bids.

COMMEMORATIVES: Plus signs may have slowed for silver commems, but activity at current levels persists. Dealers pursue almost all issues in MS-63 and 65, and several are making markets in the as yet unreported MS-64 grade.

TYPE: Price changes in this area are minimal this week. It seems like most dealers are ignoring type, but such is not the case for some dealers. They are quietly buying properly graded coins that fit into their programs. As long as this area appears quiet, most coins can be bought at these levels.

GOLD: Many of the investment houses have slowed or stopped their buying of U.S. gold. In some cases, they are over inventoried which is reflected by the lack of price changes for XF thru MS-60's. This slowdown, however, has not reflected a weakness in the MS-63, 64, and 65 grades, as dealers continue to search for these elusive grades.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary

MS-63 (CHOICE UNCIRCULATED) Will have many bag marks; may show only a slight weakness of strike. Should have full eye appeal and be above average eye

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing fabe and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

MS-64 DOLLARS ADVANCE SHARPLY

Dealers Have Difficult Time Locating Product

The Market in Depth

Dealers are having a heck of a time buying coins these days---whether it be at coin shows, on teletype, or at auctions. The first stumbling block is locating the right coin. It seems that the coins the dealers are trying hardest to sell are the ones that buyers are not looking for. The coins that sell themselves are the ones most difficult to locate. When those eye appeal coins are located, the second stumbling block is encountered; the price. But, if the buyer is one of the numerous market makers across the country, then this barrier is usually crossed quickly. This situation is not new, but it seems to become more of a problem with each passing year. As more and more quality coins are put away for long term investment, it seems that higher prices only bring about 10%-20% out of hiding over the same time span. This is true in nearly every series of the market (MS-64 and better); especially type, commems, gold, walkers, mercs, and dollars.

The BU roll market, recently dominated by the Roosevelt, Washington, and Franklin series', now finds activity strongest in the Buffalo, Mercury, and Walking Liberty issues. The rolls in the 30's (availability is limited to specific dates, such as, Buffs: 1937 and 38; Mercs: 1941-45; Walkers: 1941-47, and not always inclusive) are rarely available in any quantity at all and higher bids usually mean that owners of these dates are even more determined to hold on to them. For many years now it has been the tendency of most dealers and investors to hold onto material in an "up market". Nowadays, it seems that most dealers prefer to buy and sell into a market even if it appears headed on a straight incline. The holding approach is fine for those fortunate enough to pick the top of the market in which to sell, but we all know how difficult that is. And, once a market tops, the number of sellers increases by plenty. The astute dealer or investor usually has a good portion of his inventory in material which is not available in large quantities and he rarely has to worry about the ups and downs of the every day market.

This Week's Market

CENTS: BU Lincoln rolls continue to be the doormat series of the coin industry. Minus signs are minimal this week, while bargain hunters are even tough to find. The only positive notes are limited to later issues: 1955-S (after falling last week is back up) and 70-S sm. date.

NICKELS: Original Buffalo nickel rolls still top various want lists at current levels, but BU Jefferson rolls remain somewhat lacklustre. The 1940-D fell to $68 bid, while the 1944-D roll lost ground to $280 bid. BU roll sets of war nickels fell to $2225.

DIMES: Several Mercury dime rolls are higher on the charts as buyers continue to search for these elusive rolls. The 1938-D and S rolls are now bid at $1800 per and the 1941-P and 42-P rolls are up to $725. Other dates are strong within current ranges.

BU Roosevelt dimes received very little bidder attention this past week, although roll sets (1946-64) are now up to $8100.

QUARTERS: This area of the BU roll market is getting very limited bidder action. The consistent bids monitored are of a bargain-hunting nature; thus causing bids to fall when sellers accept these discounted levels. Again, this information is somewhat limited, but overshadows the visibility of the bid buyers.

HALVES: Several dealers are still in the hunt for original Walking Liberty rolls, but some have lowered their expectations and will take nice put-together rolls at lower levels.

BU Franklin rolls are steady at today's bids, but once again, reported transactions are few and far between.

DOLLARS: MS-64 dollars are definitely where the action is for the time being. Plus signs run literally the length of this column, covering almost all of the so-called common dates along with some better ones. A number of dealers have recently jumped into this market and are now realizing how hard they are to locate in quantities. Whether some dealers think they can get some of these coins certified as higher grades is another question. But, without a doubt, they are real buyers of MS-64 coins.

Most of the buys in the Ike series are back to a very limited variety of dates. The only plus signs found this week are for the BU 1971-S and 72-S 40% silver; the Browns do not find the usual bidders and sellers can be located at current levels, usually in limited quantity lots.

PROOF SETS and MINT SETS: Proof sets remain very active (1936-64) within current bid ranges. The 1950-53 sets are almost as difficult to locate as are the earlier 1936-42 sets. Of course, unspotted, unhairlined sets are even harder to find.

COMMEMORATIVES: Activity for silver commems remains constant in all grades, although the higher buyers have slowed their advanced bidding. The Olympic $10 gold pieces seem to be on the upswing once again, and action persists for the Statue of Liberty coins. As usual, prices for new issues tend to fluctuate for some time before settling down. The half dollars are trading at $6.50-$7.00 for BU and $8.25-$8.75 for proof. The silver dollars are running $23.50-$24.50 BU and $25.50-$26.50 in proof. The 3-piece sets including the $5 gold piece are trading between $420-$440 for BU and $440-$460 in proof.

TYPE: This area appears rather stable for the moment, as most dealers would rather buy properly graded coins within 10% of bid for respective grades than sell at these levels. Oh sure, they would love to sell borderline coins or split grade coins at just under bid levels, but not the full, no-question graded coins.

GOLD: There has been a flurry of price changes for U.S. gold this past week, in VF thru MS-60. Most changes are to the downside as many of these issues correct from recent highs. The AU and MS-60 grades suffered the most setbacks, while lesser grades found a few plus signs. MS-63 thru MS-65 continue very elusive and are very much in demand at current levels.

FOREIGN GOLD: (Modern & Restrikes. Tradad in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $350.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-63 (CHOICE UNCIRCULATED) Will exhibit some bag marks; may show only a few abrasions of original luster and have full rims. Most are above average in eye appeal.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

800-THE COIN

(800-843-2646)

Here's what makes ADEC numismatic gold the best investment for you, for either the short or long term:

The ADEC Sealed Package: The Key to a Daily Market. Each ADEC coin comes individually sealed in a protective packet. As long as the seal is never broken, you can buy and sell ADEC gold for the current quoted price, every day.

The ADEC sealed packet turns numismatic gold into a worry-free way to trade the #1 investment.

No Grading Hassles. As long as the ADEC sealed package is never tampered with, you can always buy and sell ADEC gold for the grade listed in the package.

A Buy-Sell Spread Similar to Bullion. Since you can trade ADEC numismatic gold like bullion, you get smaller spreads – 2% - 2½% on the average. This makes ADEC numismatic gold an excellent investment for either the short or long term . . . the most versatile investment on the market.

Order Now! 6 Coins in 4 Grades to Choose From. Due to the large number of orders received, ADEC has expanded its inventory to include 6 different numismatic gold coins – in 4 different grades. We give you more investment options than any similar firm on the market.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

DOLLARS AND COMMEMS, STRENGTH OF MARKET

U.S. Gold In Strong Demand; But, At Lower Levels

The Market in Depth

One of the brightest spots in the market continues to be silver dollars, that is, strictly graded MS-64, MS-65, and prooflike MS-65's. The most frequently encountered want lists specify these grades of dollars, all the while rejecting lesser grades. Much of the actual transactions at coin shows involve these grades. At the present time, there are numerous buyers of these specific grade coins, with some dealers offering to pay more than any other advertised buy prices right across the board. Some other dealers offer minimum buy prices for any or all common dates, with higher prices for specific dates. Then, there are the buyers of better to rare dates, all within current ranges or higher. Many of the better dates would be purchased in quantities if found, but buyers usually have to settle for just one or two, if any at all. Many of the New Orleans minted coins are very difficult to obtain in the upper grades (mainly due to the characteristically soft strike), but, the 1891-O thru 1897-O can almost be described as impossible to find. In comparing bid prices of these particular issues, it becomes extremely easy to understand their relative value to each other when comparing chances of availability.

Grading is a strong determinant of many potential sales. It is the first barrier to overcome before the issue of price can be addressed. Today's buyers are definitely more fussy than the buyers of six years ago. Grading standards have changed and been refined for the betterment of the industry. Although, this is not always the case when it comes to selling. This is why one can find such a variance in selling prices in some advertisements for numerically identical coins; such as, an MS-65 1880-S silver dollar at $125, $275, $324, $500, $650, etc. When selling standards are as strictly adhered to as buying standards, then this industry will have overcome a tremendous psychological barrier.

The fact remains, however, that the buyer ultimately determines the price, by either, accepting or rejecting the particular coin. If standards have tightened, it is the buyer who has forced this to occur. He wants a nicer coin than he has accepted in the past. Most of the new generation numismatists accept this situation. It is the "old guard" that has a hard time accepting the new grading standards. Mainly because they are so used to "new" or "used" as descriptions, with commensurate prices: $10 or $5. Now it's MS-65/$5000 or XF/$83. With such increases in values, which, by the way, was brought on by more demand by an increasing number of numismatists, in-between grading had to come. This is only logical. If an XF coin bids $10, and an uncirculated one bids $100, is there someone out there that would sell his near-perfect or gem coin for that $100 bid (which is supposed to categorize all uncirculated coins) if someone offered $1000 for it? That's the two-tiered thinking that some dealers propose to go back to. This way customers couldn't tell what their coins were worth. Now, with more precise grading, values are more determinable. This is why in-between grading is the standard by which most dealers follow. Digression is for memories, the old days, progress is the future.

This Week's Market

CENTS: For BU Lincoln rolls the market remains rather passive. Actual buying activity is on the thin side while sells have to be awfully sweet looking to attract a bargain-hunter. The 1937-P roll fell to $32 bid, while the 1955-S roll rose to $8.25 bid.

NICKELS: There were no changes in bid levels within BU nickel rolls, Buffaloes or Jeffersons, although Buffalo rolls are in constant demand at today's levels. Jeffersons see very limited activity on the buy or sell side of the market.

DIMES: BU Roosevelt dime rolls finds very little buyer interest at current bids, yet most sellers are not rushing out to give rolls away either. On the other hand, original rolls of Mercury dimes see higher bids repeatedly. This week finds the following rolls wanted at higher bids: 1935-P, 37-P, 38-D, 39-P, 40-P, 41-P, 42-P, 43-P & D.

QUARTERS: Most early BU Washington quarter rolls, 1934-49 (with the exception of 1946-S & 48-S, both lower), are steady at current levels. But, beginning in 1955 (except 1955-D), numerous dates are lower as some dealers sell various quantities to the now lower, higher buyers.

HALVES: Original rolls of Walking Liberty halves, although not plentiful, will still foster excitement when available and offered within current ranges.

BU Franklin rolls remain steady at current bids, except for the 1955-P, at a lower $375 bid, but Kennedy rolls continue to slide (1964-69).

DOLLARS: Actual changes are minor this week in the MS-65 and better coins, but strength is evident by the number of buyers with the large quantities wanted. Original dollar rolls are active within current ranges, but, put-together rolls of consistent MS-60 quality will only bring $550 to $575 per roll.

Minus signs appear for many of the 40% silver Ike issues and roll sets have fallen to $3400 bid.

PROOF SETS and MINT SETS: This was a somewhat quiet week for both proof and mint sets, but for different reasons. Availability is rather limited for the silver proof sets (1936-64). Most mint set owners are reluctant to sell at the lower levels which buyers are offering.

COMMEMORATIVES: Just look at the plus signs in the MS-63 column! The activity gets stronger with each passing week as it becomes harder to locate MS-65's. MS-65 specimens remain on the most wanted list, but there just isn't much material around. This increases the desire of dealers, collectors, and investors to own the best available, which looks like MS-63 and MS-64 coins.

TYPE: When it comes to bidding activity this has been one of the quietest weeks in a long time for type. There are virtually no changes, which would seem to indicate buyers and sellers are meeting at mutual prices. If this is the case, it is on a very limited basis.

GOLD: It seems that MS-60 and lower graded gold is not the area to be involved in at the moment. MS-60 gold has suffered setbacks almost the length of the column. There are definitely many sellers at these lower levels. After reaching the high bids in late 1985, it was almost an inevitable fact that prices would come down. It does appear that some MS-63 coins are becoming available.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $355.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-64 (CHOICE UNCIRCULATED) Will have ... or two marks may show only a slight weakness of strike ... Will have full ... These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

TRIPLE YOUR KNOWLEDGE
STUDIES BY JIM IACOVO & RAY MERCER

1. THE STATE OF THE RARE COIN MARKET, Jan—Feb., 1986, 24 pages, $12. This highly informative issue is a MUST for EVERY serious collector/investor! A timeless guide, this candid report covers a multitude of important topics for today's rare coin buyer. Is the market REALLY "roaring hot," the TRUTH behind the Salomon Brothers survey, exactly what is a "guaranteed" buy-back?, what do the CDN "MS-65" listings really mean?, the state of the wholesale marketplace, are you prepared to hold YOUR coins 7-15 years?, the outlook for numismatics, a VALID CRITIQUE of NCI, ANACS, and the MANY other "grading" services, an HONEST explanation of today's grading standards, the MOST UNDERRATED U.S. series, HOW to determine GRADE & VALUE, the TRUTH behind past price performances, a dealer's responsibility to the public, 12 essential facts EVERY investor should know, and much, much more!

2. THE INVISIBLE EMPIRE, Dec., 1985, 12 pages, $6. RAY MERCER conducts an exclusive interview with one of America's major telemarketers! Find out how his business works, how a dealer thinks, marketing ploys designed to get YOUR money, what the markup really is, how to go about discovering the correct grade & value of your investments, what type of coins are sold and why, plus get some friendly ADVICE on how to avoid the pitfalls of numismatics. Fascinating, candid reading for those of you who want to know about this MAJOR FORCE in the marketplace. Telemarketers spend so much money either directly or indirectly in the coin market that sooner or later you will feel their financial impact — if you haven't already! This report is a must for anyone interested in numismatics, marketing techniques, and human nature!

3. HOW TO LOOK AT A COIN, Jul-Aug., 1985, 20 pages, $12. This timeless report continues to sell and sell and continues to educate our readers in its second printing! This highly informative and easy to understand report by RAY MERCER takes you on a step by step journey through the process of learning how to skillfully grade your coins. In depth topics include detailed explanations on luster, strike, die definition, focal points, detracting marks, die abrasion, eye appeal, and toning. Dipping and cleaning are frankly discussed along with the need for proper lighting and the absence of stress. Learn how some market promoters play the game of changing the "grading label" on your coins to support the illusion of steady, wholesale price increases. This timely report is a must for every collector/investor who seriously desires to improve upon his/her grading skills and understand our ever-changing marketplace.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

MS-64 DOLLARS CONTINUE TO CLIMB

Commems Remain On Want Lists

The Market in Depth

In the past, it seemed that three coin shows were considered "bell-wether shows" for the year, that is, a leading indicator of which direction the market was headed. These shows were (and still are) FUN, Long Beach---all three shows, and ANA. Assuming this to be the case, we now have a number of other shows which might be considered "mini-bell-wether shows"---almost one a month: Mid-winter ANA, National Silver Dollar Convention, Georgia Numismatic Association, St. Louis Numismatic Association, and this week's Central States Numismatic Society Convention. The activity level at this show should be a determining factor for sales over the next three months.

Several leading market makers know exactly the kind of quality coins in each series they are looking for. Not only that, they know how much they are willing to pay and, in fact, how much they will stretch for specific coins. Their biggest problem is finding material. Most people are reluctant to sell what is "hot". This means that many dealers want to sell slow moving material and replace it with today's more popular series. Many of the dealers, who are not in the mainstream of activity, along with collectors and investors are in a mental limbo at this point in time. They know what coins are active, but they are concerned with possible continued grading adjustments. Will there be further strides toward strictness or are we at a crossroads where grading will remain consistent, now and in the future? All the grading services and guarantees have many numismatists confused as to which direction the buyer should travel. Which papers will hold the best value in the coming years? Which company's buy-back guarantee will outperform another's and withstand the test of time? It all reverts back to, grading is subjective, each coin stands on its own merits, buy the coin not the paper, and knowledge of the market and how to grade are your most important assets. Stay tuned. The future holds the answers.

BU rolls of silver (Roosevelt dimes, Washington quarters, Franklin and Kennedy halves) do not have any support at current levels. The major buyers of rolls in these series are buyers at discounted levels, usually at about 10% off bid. Over the past few months, many dealers refused to sell at discounted levels, but, as of late, it looks like the discount buyers are the only buyers for the majority of dates. This, of course, has the anticipated effect on price levels when other dealers accept these offers. As all other buyers have deserted this BU roll market, naturally, prices have decreased minutely over this period of time. That is, until this week when a major percentage of dates have tumbled markedly. Of course, the price of silver falling substantially hasn't helped the confidence level of many investors, dealers included.

This Week's Market

CENTS: Another round of minus signs jot the BU Lincoln rolls column. It is interesting to note that all of the minus signs are for 'P' mint rolls only. Could be that 'P' mint rolls are more readily available in quantities and dealers do not wish to stock the high mintage rolls. 1960-P sm date rolls were active at a higher $78, but the want list was filled so bid remains at $75.

NICKELS: A handful of BU Jefferson nickel rolls have fallen as some dealers reduce stocks of these slow moving rolls. Original rolls of Buffalo nickels continue active at today's levels, with some dealers looking for the harder to find mintmarked rolls from 1934 thru 36.

DIMES: Original Mercury dime rolls carry the majority of the plus signs in this week's market. This series is gathering strength every week as dealers can sell gem singles at what they feel are still reasonable levels.

Most BU Roosevelt dime rolls, from 1958-64, are taking a beating. Minus signs appear throughout these late-date silver rolls.

QUARTERS: Bid prices are substantially lower for many dates within the BU Washington roll series. Every date from 1956 thru 1964 is lower as the support level has been reduced by the lack of buyers. In fact, even some earlier dates aren't all that easy to sell. The next few weeks should be very interesting.

HALVES: BU Franklin rolls are in the same boat, as bids sink to lower levels. The majority of dates have fallen this week as buyers are reluctant to jump into a soft market with bids threatening to decline further. Early dates which fell were: 1948-D ($290), 49-P ($975), and 51-P ($290). Every date from 1954-D thru 1963-P & D (except 1960-D) fell this week.

BU Kennedy rolls fared no better as several dates from 1965 to 1970 dropped.

DOLLARS: MS-64 dollars appear to be the hottest area in this series. Plus signs are scattered all along the 64 column as numerous buyers attempt to outbid each other for the somewhat limited supply. Circulated dollars have taken a real bath this week as falling silver prices have destroyed the confidence level of the usual strong buyers of VG's thru XF's. Some of the marketmakers have not just lowered their buys, they have removed them.

PROOF SETS and MINT SETS: These two areas are basically unchanged this past week. Oh yes, there are a few minus signs for late-date sets, 1968 and after, but they are nominal at best, and represent some dealers' attempts at reducing inventories. The 1936-64 proof sets continue on want lists at current bids.

COMMEMORATIVES: The MS-64 column for commems is just around the corner. It has taken some time to rearrange some sections, but the logistics are nearly in place. Activity for this grade is as commonplace today as for MS-65's. MS-63's continue active with new buyers wanting any and all issues at today's levels. There are numerous plus signs in the MS-65 column.

TYPE: The 64 column for proof and MS type will be instituted in the next couple of weeks. As more and more dealers are using this grade it has become necessary to include this column. Type is quiet, but constant.

GOLD: Just about every denomination in MS-60 or lower has fallen this week. Obviously, the drop in gold price has not helped the situation any. Nonetheless, the main reason for lower prices is that the market is correcting after the long months of price increases. Many dealers are trying to sell their low quality gold which places vast amounts of material on the market.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $332.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (CHOICE UNCIRCULATED) Will have many bag marks and may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-63 (CHOICE UNCIRCULATED) Will have many bag marks; may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

You've read about us. . . You know us by reputation. . .

But. . .

Have You Ever Done Business With Us?

For many years—since 1953, in fact—we've been keeping discriminating buyers happy. In the process, by outright sale and by auction, we've supplied our clients with great rarities (1787 Brasher doubloon, 1804 dollar, 1913 Liberty Head nickel, 1822 half eagle, 1870-S $3, etc.—just about every rarity in the book!) as well as untold numbers of key dates, "type" coins, Morgan silver dollars, commemoratives, etc. If anyone has sold more coins to more collectors and dealers than we have, we have yet to learn about it!

But, have YOU bought from us? This is the important question! If not, we invite you to clip the coupon below and send it is us. Do this, and we'll send you our next several catalogues and price lists—a sample "Rare Coin Review" (cover price: $3) and several "Special Coin Letter" issues ($2 each)—a value of $10 or more—ABSOLUTELY FREE! This offer is limited only to Coin Dealer Newsletter readers who have not ordered coins or subscribed to our catalogues during the past two years.

Are you fussy about quality? Do you want the satisfaction of dealing with a firm of unquestioned professional and financial reputation. Do you want to learn of special offers, listings of important coins for sale, and other values? If so, send us the coupon below and we'll do the rest! We look forward to the possibility of having you as a client!

Sincerely,

THOMAS J. BECKER

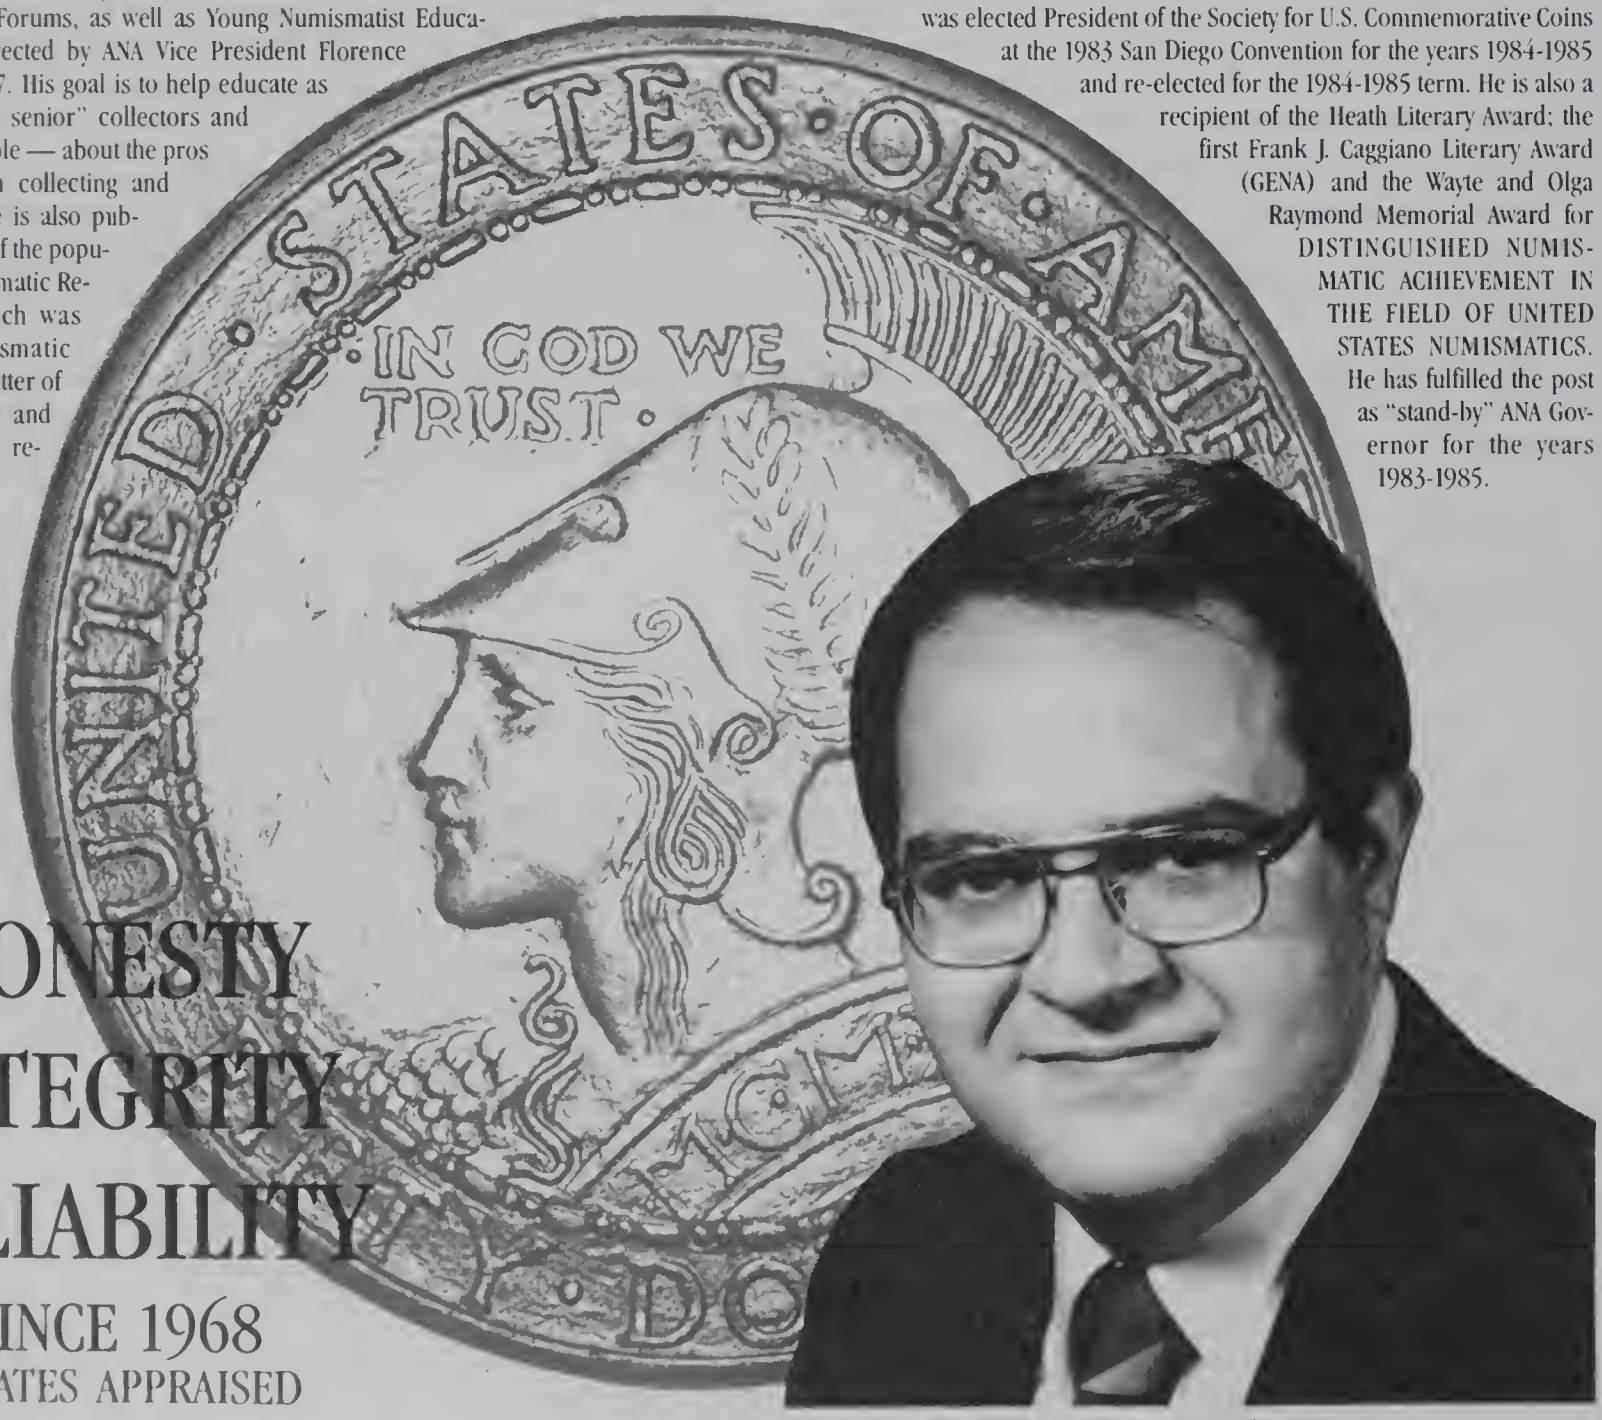
WHO IS ANTHONY SWIATEK?

He is a recognized contemporary authority on silver and gold commemoratives. Swiatek is co-author of "The Encyclopedia of United States Silver and Gold Commemorative Coins 1892-1954," which received the Numismatic Literary Guild's Book of the Year Award in 1981. He testified before the House Banking, Finance and Urban Affairs Subcommittee on Consumer Affairs and Coinage in May of 1981 regarding U.S. commemorative coinage, and his opinions and work are cited in the new Library of Congress study "Issuing Commemorative Coins: An Historical Overview."

He again testified on December 15, 1982 before the same Subcommittee, to help support its Chairman, Frank Annunzio, in his quest to attain better Olympic Coinage designs for the collector and hobbyist.

Mr. Swiatek was invited by Donna Pope, Director of the Mint, to strike the fifth George Washington ceremonial commemorative half dollar, as well as the thirteenth striking of our Olympic commemorative dollar. He was later an invited guest at the White House presentation of Olympic coins to the Olympic Museum by President Reagan.



He is a director of the Numismatic Literary Guild. He is a Consultant to ANACS, and is on the Board of Governors and panel of lecturers at the Institute of Numismatic and Philatelic Studies at Adelphi University (N.Y.). He sponsored and is part of the First Comprehensive Home Study Course Fundamentals of Rare Coin Collecting and Investing and has written the ANA's Home Study Course dealing with Commemorative Coinage. He has lectured in many education forums at major coin shows and coin clubs throughout the United States. This includes the continuous ANA Educational Forums, as well as Young Numismatist Educational Forums directed by ANA Vice President Florence Schook since 1977. His goal is to help educate as many "young and senior" collectors and investors as possible — about the pros and cons of coin collecting and coin investing! He is also publisher and editor of the popular Swiatek Numismatic Report (SNR), which was voted Best Numismatic Investment Newsletter of the Year 1983-84 and 1984-85. He also received the N.L.G.'s literary awards for Best Magazine Article and Best Book U.S. Coins — THE WALKING LIBERTY HALF DOLLAR in 1984.

A full time Professional Numismatist since 1977, he examines between forty and fifty million dollars in coins yearly for his clients' portfolios. He has a column appearing regularly in *Coin World*; writes for *COINage Magazine*; has written for the *Forecaster*; *The Rosen Numismatic Advisory*; James Blanchard's *The Market Alert*, *Coins Magazine*; Gary North's *Investment Coin Review*; *The B.A.I.R.*, for *Scott's Standard U.S. Coin Catalogue* where he had his personal section dealing with altered and counterfeit coins; the *Buy and Sell Price Guide to U.S. Coins*; the *Red Book* or *Guide Book of U.S. Coins*, and contributed to the *Official ANA Grading Standards for Coins*, developing today's grading standards for the commemorative coinage of the United States of America, and is a contributor to Scott A. Travers "The Coin Collectors Survivors Manual." He received his Master's Degree from The City College of New York (CCNY).

When asked about coins, he says: "I eat, sleep and breathe coins. It is something which you constantly work at — and at all hours. It is not a 9 to 5 job, but a love affair."

Swiatek, 43, recently appointed an "Admiral in the Great Navy of the State of Nebraska" by Governor Robert Kerrey, is a life member (#1099) of the ANA, AINA, CSNA, FUN, GENA, GSNA, MSNA, and NASC (SM) etc. He is also a member of the 1991 Club, ANS, CSNA, ESNA, NCNA, PAC, SPMC, TNA, WCCC, ICTA, etc.

He received the American Numismatic Association's Adult Advisor Award and was elected President of the Society for U.S. Commemorative Coins at the 1983 San Diego Convention for the years 1984-1985 and re-elected for the 1984-1985 term. He is also a recipient of the Heath Literary Award; the first Frank J. Caggiano Literary Award (GENA) and the Wayte and Olga Raymond Memorial Award for DISTINGUISHED NUMISMATIC ACHIEVEMENT IN THE FIELD OF UNITED STATES NUMISMATICS. He has fulfilled the post as "stand-by" ANA Governor for the years 1983-1985.

Panama-Pacific Double Commemorative Set. In original copper descriptive frame, as issued. Aesthetically, probably the finest designed coins ever issued by the United States. Also, one of the great American rarities, as only 12 Double Sets were produced, with perhaps no more than 6 or 7 known to exist today with the original frame. The set is truly magnificent in all respects, with each and every coin being either **CHOICE** or **GEM BRILLIANT UNCIRCULATED.** The frame itself is SUPERB showing just the very lightest of handling. The deep, rich purple and gold color is completely pristine and unfaded. On the back of the frame can be found the original price tag of $400.00, which was the issue price back in 1915. A once in a lifetime opportunity for the collector who demands both the finest and rarest. $185,000.00.

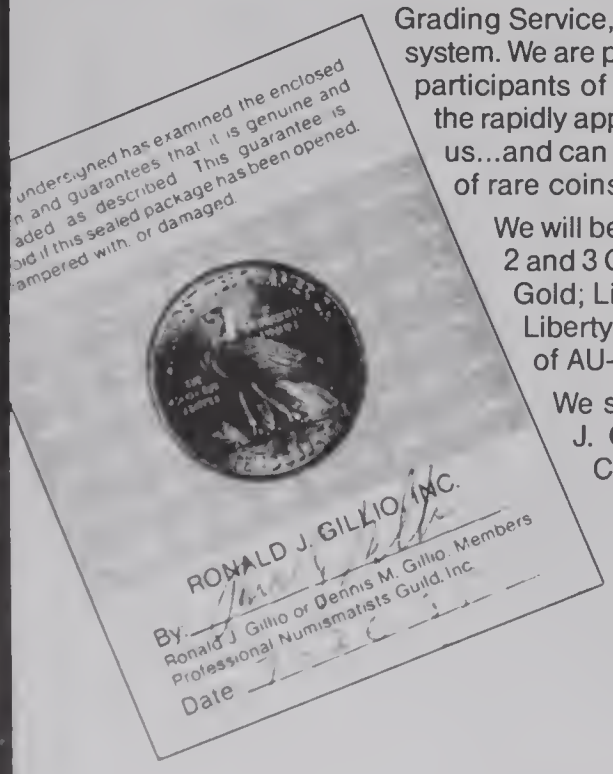
HELP CELEBRATE...

the 25th anniversary of the popular Northern California Numismatic Association's San Francisco Exposition and our own quarter century as professional numismatists.

For the third consecutive year, Pacific Coast Auction Galleries will be conducting the sale at the popular Northern California Numismatic Association Convention in San Francisco.

We seek consignments of individual rarities or collections of U.S. or World Coins, and offer low rates, a handsome catalogue and an enthusiastic group of bidders.

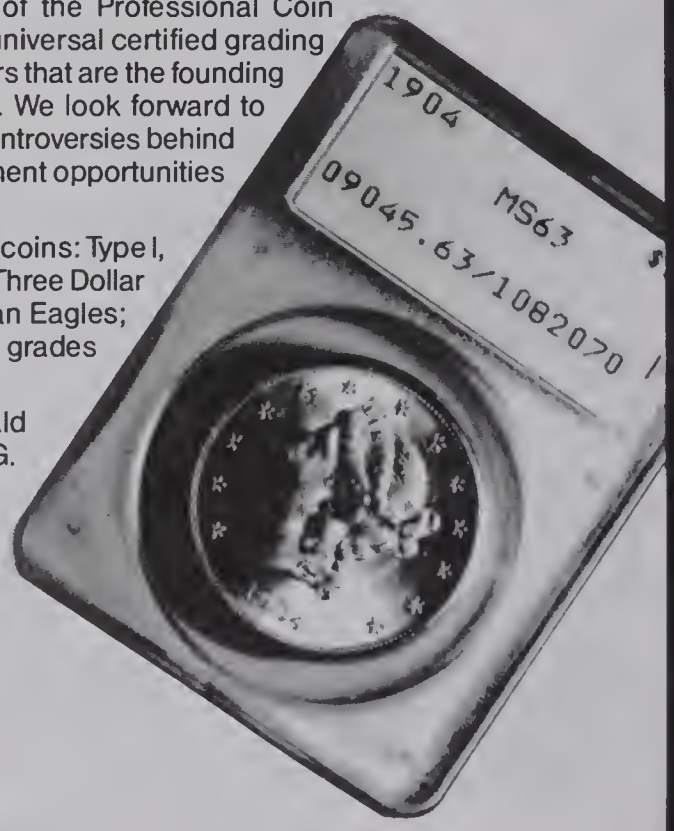


This year, the show and auction will be better than ever. Twice as many dealers! The September 25-28 show will feature more than 140 bourse tables in contrast with the fewer than 80 tables available in 1985. Many more collectors and investors will be attracted by a unique roundtable discussion of "Numismatics in the 21st Century," led by the presidents of the American Numismatic Association, the American Numismatic Society, California State Numismatic Association, Numismatic Association of Southern California, Canadian Numismatic Association and Sociedad Numismatica de Mexico.

One auction session will be devoted exclusively to U.S. gold coins certified by the Professional Coin Grading Service. Consignors will have the option of having their coins certified by the P.C.G.S. for inclusion in this special session at a cost of only $15 per coin.

To discuss possible consignments, please write to Ronald or Dennis Gillio, Pacific Coast Auction Galleries, 1013 State Street, Santa Barbara, California, 93101. Or call on our toll free number (800) 235-6937; within California call collect (805) 962-3197.

"Someday all rare coins will be sold like this"



When we announced our AUTHENTIGRADE program in 1985, we predicted that "Someday all rare coins would be sold like this." Now, with the creation of the Professional Coin Grading Service, the industry has taken a giant step towards a universal certified grading system. We are proud to be counted among the 32 leading dealers that are the founding participants of the comprehensive and revolutionary P.C.G.S. We look forward to the rapidly approaching day when we get the major grading controversies behind us...and can return to the old fashioned joys and new investment opportunities of rare coins.

We will be making a market in the following P.C.G.S. gold coins: Type I, 2 and 3 Gold Dollars; Liberty and Indian Quarter Eagles; Three Dollar Gold; Liberty and Indian Half Eagles; Liberty and Indian Eagles; Liberty and Saint-Gaudens Double Eagles...in P.C.G.S. grades of AU-58, MS-60, MS-63 and MS-64.

We stand behind every purchase made from Ronald J. Gillio, Inc. and can offer the respected P.N.G. Certificates with coin purchases.

Please consider us for all of your numismatic needs — wholesale or retail, individual rarities or bullion, U.S. or World Coins.

MS-64 DOLLARS HIGHER ACROSS THE BOARD
U.S. Gold, MS-60 & Lower, Continues Fall

The Market in Depth

The Central States Numismatic Society just wrapped up a convention that they can be very proud of. It was very well attended and the show committee ran it efficiently. Yes, there were the usual complaints by the few dealers who sit at their bourse tables and expect business to come to them. But overall, most dealers had a very satisfying show. Although, U.S. gold prices are still correcting downward in VF thru MS-60, activity was brisk. Moreover, the outlook is not that bleak, as most dealers expected this drop and are adjusting their prices quickly to the new lower levels. A few dealers offered and sold large lots of $10 and $20 gold pieces at well below their original cost, just to turn inventory and re-evaluate their current buy/sell spreads. The most active materials changing hands were MS-64 dollars (MS-65's were also being sought, but much harder to locate) MS-65 Mercury dimes,Walking Liberty halves (type was also difficult to find), and, of course, MS-63 -- MS-65 commems.

The CSNS auction (by McIntire Numismatic Auctions, Inc.) realized over a million dollars for the 2500+ lots. The following are some sample prices realized:

Denomination	Grade	Price
1944-D Steel Cent	MS-60	$ 2,310.00
1845-O S.L. Half Triple cut date	XF-45	$ 1,320.00
1798 Bust Dollar	XF-40	$ 4,840.00
1895-S Dollar	MS-63 P/L	$ 4,125.00
1898 Dollar	Cameo PR-67	$19,690.00
1907 $20 St. Gaudens high relief	MS-63	$13,750.00

At the CSNS Dinner Banquet, which, by the way, was one of the best attended banquets in memory, anolder gentleman was leading a discussion at his table, informing the other guests about his retirement from his store. He said that he only wanted to deal with his present group of clients and not with the new generation of younger dealers who graded coins MS-64, 65 . . . . He said that he was "persnickety" and didn't have to deal with the grading numbers. I think he summed up our industry quite well in that one term. CDN Dictionary of Terms: Persnickety----demanding, the desire for value, fussy about small details, fastidious, requiring great precision, requiring properly graded material at a comparable price. Persnickety is what everyone is today, and well they should be. One cannot be lax in their grading skills---whether dealer, collector, or investor.

* ICTA IN A CRUNCH: The Industry Council for Tangible Assets, the coin dealer watchdog organization in Washington, was at the Central States show with some harsh news. Their efforts to help dealers, collectors and investors may be stalled without some fast financial help. ICTA is now fighting a proposal to require filing a form 1099B every time any dealer buys any coin---including numismatics. ICTA is working on the new bullion coin program and is pushing to get tangibles back in IRAs and Keogh plans. All dealers have been requested to join ICTA and others are asked to contribute to ICTA's efforts. Write or phone ICTA President, Howard Segermark, #520, 1701 Pennsylvania Avenue, N.W., Washington, D.C. 20006. (202) 785-8600). Now! ICTA is working for you.

This Week's Market

CENTS: A rash of minus signs has once again hit many of the early BU Lincoln rolls. Several issues from 1935 to 1941 are finding lower levels do not guarantee sales. Many dates offered, seem to remain unsold.

NICKELS: BU Jefferson nickel rolls appear to be falling into the same habits as other modern series: Lower prices. From 1944 to 1958, various dates are lower this week as dealers try to unload unwanted material. Almost every series of U.S. coins falls into either a positive or negative category. If several dealers don't want it, then it becomes almost impossible to sell. On the other hand, if several dealers want it, everyone wants it and it becomes almost impossible to locate. This is how specialized the investment segment of the coin industry is becoming. If it's not hot, it's not selling.

DIMES: Common date Mercury dimes, in MS-65, remain highly active and many plus signs can be found in the Monthly Summary. For that matter, almost all dates are wanted at bid or higher. Original rolls command between bid and ask and the larger the quantity, the stronger the asking price.

BU Roosevelt dime rolls are still weak with a few dates listed at lower levels. There appears to be an overabundance of rolls of some issues from 1952 to 1955.

QUARTERS: Fallout continues to hit numerous issues of BU Washington rolls. More specifically, 1946 to 1958 (not every date & mint), are experiencing added weakness every week. There is very limited support, but only at lower levels.

HALVES: Some of the later (1955 and after) BU Franklin rolls are still retreating to lower levels. It's a wonder that some of these dates can get this weak after being so strong, but it's apparent that very few buyers are interested in this BU roll series.

DOLLARS: This is the largest number of plus signs for MS-64 dollars since we instituted this column over a year ago. Needless to say, this grade has fully taken hold and is being used by a majority of the dealers. Moreover, the few dealers who don't agree with MS-64, still do business between MS-63 and MS-65 bids. MS-65 prooflike dollars have almost as many plus signs. A number of dealers will buy any date that is fully prooflike and grades MS-65, at, or well above the current bid ranges.

PROOF SETS and MINT SETS: Changes are nominal in these two areas. Demand is strong for 1936-64 proof sets and mildly warm for 1947-55 mint sets.

COMMEMORATIVES: MS-65 commems have plus signs almost across the board. Dealers are having much difficulty in locating enough gem material. Any issue will bring bid prices if the quality is there. At the CSNS Convention, an original presentation card of five Stone Mountains brought $6000. They were all toned, both sides. These gems then sold again at $8250.

TYPE: Although this area appears sluggish, according to several type dealers, there is not enough nice material---63, 64, 65----available that matches the asking price.

GOLD: MS-60 U.S. gold is still taking a beating, while small denomination circ material does likewise. Even a couple MS-63 issues are experiencing some price adjustments, although demand remains strong---it's just that buyers want to pay less for the material.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $339.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence of rub or friction. However no further qualifications are necessary. It will be bag marked and/or weakly struck and may not have full lustre.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks; may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

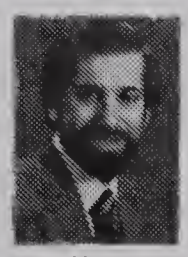
MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 --but with the additional feature of deep mirror prooflike surfaces both sides.

Consign to the 1986 sale

. . . and draw on 150 years of numismatic experience

WHEN YOU CONSIGN YOUR collection to Kagin's 1986 ANA sale, you put your coins and currency in the hands of four of the top numismatic experts in the country: A.M. Kagin, Donald Kagin, George Fuld and Dale Williams. Collectively, these gentlemen possess 150 years of experience—150 years of collecting, studying, grading, buying, selling and trading rare coins. These coin experts are also veterans of the auction business. Together they have almost 500 auctions under their belts. And they haven't put together that many auctions without learning the importance of personal service and the special needs of the consignor.

IN ADDITION TO OUR FOUR resident experts, Kagin's also enlists the professional assistance of some of the best-respected names in the business to help prepare the catalog. For the 1986 ANA auction, our consultants will be Walter Breen, vice president of research at First Coinvestors, Inc. and Bruce Lorich, president of Bruce Lorich & Co., Inc. Mr. Breen and Mr. Lorich will work with Kagin's experts to pedigree and describe coins for the catalog. Kagin's catalogs are always fully illustrated with black-and-white photos and color plates of highlights of the sale. This catalog will be no exception.



KAGIN'S MAKES PERSONAL, one-on-one attention our highest priority. When you call us, we refer you to the expert who can best answer your question or process your request—be it one of our numismatic professionals or a member of our support staff. From providing advice and pre-lotting and grading, to acknowledging our consignors in the catalog, to guaranteeing prompt turnaround on prices realized and payments, Kagin's specializes in courteous, efficient customer service.

Announcing The Private Sale of The Alan Hager Silver Dollar Collection Part Two Of A Four Part Sale of 221 Silver Dollars

A ONCE IN A LIFETIME OPPORTUNITY TO OWN THE RAREST AND FINEST KNOWN DOLLARS AVAILABLE IN 26 YEARS

Mr. Hager started his silver dollar collection in 1959 and has viewed well over 2 million silver dollars in 26 years. In those years Mr. Hager collected 221 gem silver dollars comprising of 2 uncirculated and 2 prooflike sets. This sale is part two; of the sixty silver dollars offered here, many are plate coins in Mr.Hager's massive 2 volume book **"THE COMPREHENSIVE GUIDE TO MORGAN AND PEACE DOLLARS IN ACCUGRADE."** Many of the coins offered are so rare that an offering of this magnitude will not be duplicated in any sale for 5 or 10 years. Mr. Hager chose to sell them this way as to offer the widest opportunity to everyone to participate in this historic sale: A . . . For those who would like to own a coin and need 90 days to pay, pay in 3 payments. Layaways are none refundable. B . . . For those who want to buy 3 or more coins selling for over $10,000 and would like to negotiate a better price please call Mr. Hager. C . . . Dealers who would like to show a coin to one of their clients, a 50% refundable deposit is requested. D . . . All silver dollars offered come with an unconditional 7 day return privilege. Holding the coins longer would deny others the opportunity to buy, (30 days does not apply to this sale.) E . . . All plate coins come with an autographed copy of Mr. Hager's book. Please confirm your offers early, first come first serve.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-65---but with the additional feature of deep mirror prooflike surfeces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

MARKET ACTIVE IN 64 COINS

64 Column Appears For Type - M.S. & Proof

The Market in Depth

The practice of recommending specific rare or semi-rare coins is a favorite custom of many coin dealers. It is a real art to be able to put your reputation on the line and outperform your fellow coin dealers. Favorable predicting is a valuable tool that enhances the probability of reaping riches by investing in those recommended issues. But, this last statement is most important: Being able to invest in the recommended issues. The majority of the dealers making recommendations use their years of experience, knowledge of the market, and expertise within a particular series in order to project future results. Most of these dealers are sincere and are not just recommending coins in their inventories. For the most part, when their customers order the recommended coins, the dealers have to go out into the marketplace to buy the coins, which in itself, helps the coins rise in value.

Almost every series has specific dates which may be good buys if priced in proportion to their true grade. The more dealers and investors who attempt to buy these coins, increases the likelihood of higher values ---profits. But, almost every dealer, at one time or another, predicts some coins which may not be available in the selected grade. When this occurs, a dealer knows that all he has to do is go out and try to buy this particular selection, all the while raising his buy price. Thus, his prediction looks good, but, very few can take advantage because of this lack of availability. This is a way of imparting knowledge, but when it is overdone the dealer obviously will not have very many coins for sale, thus, showing great paper profits, but having no customers.

So, most dealers try not to overdo this. They use this technique only to inform their customers of the rarity of some issues. It would be considered counterproductive to recommend only issues which are unavailable, since the majority of dealers make their living buying and selling coins, not just predicting correctly. Nevertheless, some dealers are quite capable of recommending various issues that are somewhat plentiful and still have the potential to increase in value considerably. Many dealers will watch for an overlap in recommendations and when they see three or four different dealers recommending a particular issue, then the previously mentioned dealers will recommend those issues to their clients. Obviously, the more dealers and customers looking for a specific item will create a demand potentially outstripping the supply.

This Week's Market

CENTS: Although BU Lincoln rolls are nothing close to warm, there are various dates that are beginning to receive some form of action, albeit, at bargain hunting prices and/or limited quantities. Despite the recent lacklustre performance of BU rolls, this week finds a few dates at higher bids. Could this be an indication of a future trend?

NICKELS: BU Jefferson nickel rolls remain quite sluggish for the majority of dates, but a few of the war nickel rolls are higher as quantities are being sought. Those with higher bids are 1943-D, 44-D, and 45-D. After falling to a very low $195 bid, the 1950-D roll has risen back to $200 per roll.

DIMES: BU Roosevelt dimes remain relatively inactive at current bids with just a few dates being offered at lower levels: 1951-D, 53-S, and 57-P. There is one positive note, the 1955-P roll is now bid $78. Original rolls of Mercury dimes are most active at current levels, along with MS-65's. Naturally, one might think that MS-60 to 63 specimens are acting in the opposite manner and this would be correct.

QUARTERS: This week finds the 1954-S BU quarter roll at a higher $125 bid, as one strong buyer is looking for large quantities. The rest of this series is stagnant at best, with several rolls actually lower. The 1947-S is down to $260 bid, while the 1948-D fell to $265. For other changes, please see page three.

HALVES: BU Franklin rolls are like playing a game of "tag"; nobody wants to be "it". Many dates suffered another round of setbacks as bid-buyers remain in hiding. There is a definite wait-and-see attitude, at least, until prices quit falling. Almost every roll after 1954-S is lower this week with 1963-P & D falling to $115 bid (hard to remember when they were this low).

BU Kennedy rolls (40% silver) appear relatively stable at current levels. Most sellers refuse to part with rolls of the most common dates at anything under $21.

DOLLARS: If you thought MS-65 dollars were active in the past, just look at the MS-64 column! Minimum bid on any dollar, Morgan or Peace, is now $225. Many dealers are trading in this market because there are coins available, whereas, with MS-65's, quantities are strictly limited.

PROOF SETS and MINT SETS: Although changes are minimal, proof sets remain stable at current levels. The 1986-S proof set is being offered at $11.75 for one week delivery. A few dates in the mint set section are lower as interest is just not as strong as with proof sets. It may be the difference in the quality of coins that keeps mint sets (1959 to date) less active. Although uncirculated and original, mint sets tend to show bag marks and are not very appealing to most collectors.

COMMEMORATIVES: Plus signs appear intermittently throughout the commem columns (MS-60, 63, and 65). Of course, MS-65's have the most plus signs as dealers scurry for whatever is available and are willing to pay in advance of bid to get them. Some dealers are buying MS-63's as they feel the gap is too wide between MS-63 and MS-65.

Bid prices for the Statute of Liberty sets were in the $460-$485 range for BU and $400-$410 for the proof. Reported mintage figures for the BU $5 gold is 96,000 and 404,000 in proof.

TYPE: The 64 column now appears for mint state and proof type. Dealers have been using this grade for quite awhile, within the type area, and it is presumed to be here to stay. There has been increasing activity in this area and will probably be moreso now that it is officially recognized.

GOLD: Although MS-60 U.S. gold continues to adjust downward, AU and lower grades are on a small incline. Circulated gold fell to the point where they weren't trading so prices came back to realistic levels and activity has once again resumed.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $342.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

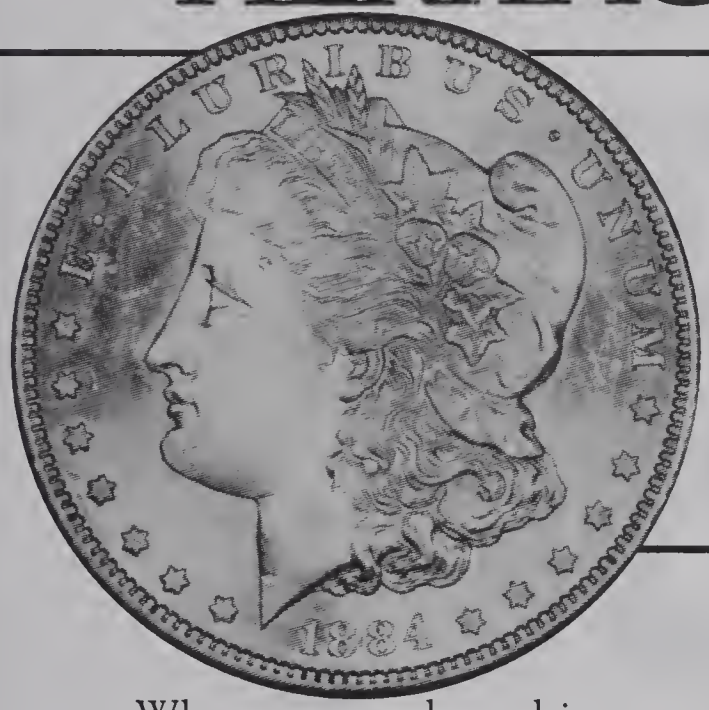
MS-60 (UNCIRCULATED) Struck with average to poor centering. Will have many bag marks and/or abrasions. Will have light overall luster or haze. Coin may be bag marked and/or weakly struck. May have lost luster.

MS-63 (CHOICE UNCIRCULATED) Will have many bag marks; may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.



MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

The Market in Depth

For those of you who would rather read by candlelight than by Edison's electric light invention, which of course, has been improved upon many times, you may overlook this article because it's just another one on the progression of numismatics over the years. Why is the MS-64 grade becoming so widely accepted, by so many? More specifically, for a prime example, we need look no further than silver dollars.

1. Quality
2. Availability
3. Price
4. Need for precision

Before these concepts are discussed, let me describe what it takes to be called MS-64. Again, for our present discussion, we will look at silver dollars. This description comes from the marketplace. Like prices, dealers dictate this grade by what they are willing to buy or sell.

MS-64---(Distinct Uncirculated) Sharply struck, with full lustre (may be brilliant or have attractive original toning). May exhibit some field distractions, but none major. Very few contact marks on main devices, cheek and breast feathers. Must have eye appeal and no disturbance of lustre which differentiates it from MS-63. Eye appeal and nearly clean devices distinguishes MS-64 from MS-63.

1. Quality---This first point may be difficult to comprehend, but, it shouldn't be. The difference between MS-63 and MS-64, like MS-64 and MS-65, is only 1 point either way. Right? Nothing could be further from the truth! The MS-64 grade is the cut-off point between severity of bag marks. MS-63 can have a quantity of marks, granted, there are limits, but MS-64 is when the buyer measures the number of marks precisely. With an MS-63 dollar, one expects bag marks, whereas, the MS-64 is noticeably cleaner and freer of those marks. But, compared to an MS-65, an MS-64 is quite close, and to many graders, indistinguishable. The difference herein, lies with possibly, one or two tiny marks. Therefore, an MS-64 dollar is a relatively nice coin.

2. Availability---This point speaks for itself. Obviously, the dealer/investor/collector community has bought and sold the MS-65 dollar quite successfully over the last decade. It has been driven into the subconscious of every buyer to purchase the best that is available. So many MS-65 dollars have been stashed away, that many numismatists now feel that MS-64 is the best available---in buyable quantities.

3. Price---Over the last few weeks, MS-64 dollars have been climbing markedly. So, this statement is late in coming. Many dealers believe that MS-64 prices are quite reasonable in relation to MS-65 price levels. This is not to say that MS-65's are too high, it's all based on supply and demand. And there is a very thin supply of MS-65's. Therefore, many dealers are quite optimistic that MS-64 prices, along with MS-65, have a ways to go.

4. Need for precision---Even though grading is subjective---and always will be---the MS-64 grade is not a figment of imagination, it is a real grade. It is no more confusing than any other fixed numeral, like MS-63 or MS-65. Every expert grader must decide for himself on how the coin should appear. Yes, numbers denote exactness,but, we are an ever-changing market. Nonetheless, as an industry, we are showing progress and the more we can help people understand, especially the subjectivity of grading, the better-off we will be as an industry.

This Week's Market

CENTS: Don't look now! But, the only changes for BU Lincoln rolls are to the upside for the second week in a row. There isn't a lot of action, but buyers, are finding it difficult to locate the quantities of specific dates they are looking for.

NICKELS: BU Jefferson rolls found only two dates changing this week as both the 1946-D & 48-D are lower. The rest of the dates found very little activity reported. The spread for 1950-D rolls is quite minimal as there appears to be buyers and sellers right at bid.

DIMES: Another run of plus signs for original Mercury dime rolls keeps this series busy. Keep in mind, the dates without plus signs are just as active, only at today's levels.

Plus signs are not the norm for BU Roosevelt rolls. This series continues to get hit hard as more minuses appear this week. The lone exception is the 1955-P roll, now up to $82 bid.

QUARTERS: Early BU Washington rolls, when they appear, seem to bring current levels, but, the same cannot be said for rolls after 1945. The 1947-S is down again (now at $245), as are the 1955-D & 58-P. The only bright spot is the 1954-S, up to $130.

HALVES: Although Walking Liberty halves remain very popular, a couple dates are lower as some rolls go unsold or sell at numbers less than bid. The 1946-D and 47-D are two of the easier dates to locate, yet, there are less likely to be MS-65's in the rolls as compared to some other dates. This is especially so for the 1946-D.

DOLLARS: See The Market in Depth article. MS-64 dollars continue to be in the spotlight. See page four for the multitude of increases. Obviously, the big buyers of MS-65's are concentrating on stocking up on MS-64's. This does not mean MS-65's are slow, they just aren't plentiful. There are still many buyers of gem quality (at current levels and higher), it's just that their marketing efforts are being shifted, for the most part, to MS-64's.

PROOF SETS and MINT SETS: Proof sets are seemingly stable at today's levels, as buyers continue to offer bid for the majority of issues. Mint sets, on the other hand, have drifted downward for specific dates: 1959, 60, 61, and 64. Earlier sets remain on want lists at bid or more depending on quality.

COMMEMORATIVES: Gem commems show another run of plus signs as several dealers try to outbid each other for whatever may become available. It is extremely difficult to locate pieces that meet the quality needs of today's persnickety buyers.

TYPE: No, there is not much type available at today's levels of MS or proof 63, 64, and 65. Most material is usually overgraded by at least a half grade, in the eyes of the buyer. And, it seems for the time being, nobody wants to step out and be the market leader.

GOLD: Minus signs are restricted, this week, to several issues in MS-60 and small denominations in AU. Decreases appear to be smaller as the downward correction subsides. Where do we go from here? Only time will tell.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $343.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly speaking, a coin with absolutely no trace of wear, but one which has obvious contact marks or other defects of strike, surface or luster. Such coins are generally unattractive and should be purchased only when scarce.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks; may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

Financial Planners and Telemarketers . . .

If you can sell rare coins, we can supply the products and provide the support.

Two plus two equals five.

We realize the tremendous role financial planners and professional sales organizations have played in the development of the hard asset marketplace. You have helped numismatics become a respected investment medium. Your expertise combined with our technical knowledge will give you the edge you have been looking for.

Our background and experience.

Joel Gabrelow and Mark Albarian have worked in the rare coin and precious metals field for several years. In addition, they were both officers in two major California banks specializing in the precious metals and rare coin marketplace. They understand all aspects of your business and have a thorough working knowledge of the rare coin and precious metals industry.

Services we can provide you.

☐ **Turn Key Products**

Because we are first generation numismatists and wholesalers we can locate coins at favorable prices. We will also design custom packaging to meet your company's requirements.

☐ **Marketing Programs**

After coins have been selected we can design a marketing and advertising strategy. This includes everything from advertising design to employee training.

☐ **Bank Programs**

We understand banking and how it relates to your business. We can help you offer bank financing programs to your clients.

The Close

You probably would not respect us if we did not try to close you. So here it is: Pick up the phone now and dial (818) 985-3900 then ask for Joel Gabrelow or Mark Albarian.

(818) 985-3900

We have been extremely fortunate in purchasing a few more estates over the past few months and the following coins are representative of what we obtained. As always we do completely guarantee each coin we sell for authenticity and accuracy in grading. If you purchase a coin from this advertisement and send it to ANACS and they do not agree that it grades as high or even higher then we have graded it, send it to me for complete money back refund. If a coin has already been graded by ANACS it will be marked with a double asterisk (**). If the coin has already been graded by N.C.I. it will have a single asterisk (*).

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

U.S. GOLD STOPS SLIDING

Prooflike Dollars on Want Lists at Higher Levels

The Market in Depth

In our discussion of "coin recommending" two weeks ago, we touched lightly on coins which may not be available in a selected grade. At this point, it seems appropriate to mention a few specific coins from various series, which, for one reason or another, are not readily available in grades above MS-63 or MS-64. (For purposes of this discussion, we will limit our list to modern coinage only.) Many educators and scholars, within our industry, have written countless books and articles concerning the rarity factor of just about every U.S. coin ever minted. These writers have documented many areas of rarity based upon low mintage, government meltdowns, or even minting problems, such as, weak strikes, planchet defects, die cracks, and polish marks, among others. The following lists by series are far from complete, but are intended to create thought provoking comments and a realization that, in some cases, the finest known example of a particular issue may only grade as high as MS-63. It is not our intent to mislead, but to inform you of various coins which are seldom encountered in any grade higher than MS-64.

This is not to say one cannot find these issues in MS-65 (Full Strike), but if you see them in dealers' ads at discounted prices, you can bet, you will get what you pay for. The main purpose here is to make the reader aware of availability problems with various series. Any further information, especially on early type, would have to be developed in an in-depth study of that series, possibly in the Monthly Summary.

This Week's Market

CENTS: BU Lincoln rolls are once again showing positive signs. There are not many plus signs, but there aren't any minuses. There were numerous offers to buy this past week for many dates at current bids. Buys were limited in quantities, in most cases, to just 1 or 2 rolls, nevertheless, this series is showing a slight warming trend.

NICKELS: BU war nickel rolls are generally higher this week as one buyer consistently tries to buy specific dates. Those most active are 1942-S, up to $330 bid; 1943-P, at $115 bid; and 1945-D, higher at $150 bid. Action for the rest of this series is somewhat sparse.

DIMES: Original Mercury dime rolls continue to elude buyers, who are willing to pay over bid, and even ask for that matter, for the right rolls.

BU Roosevelt dime rolls appear to be taking a breather from lower prices. The only exceptions are the 1958 & 59 issues. The 1955-P roll is now up to $85 bid.

QUARTERS: BU Washington rolls are relatively subdued with minor changes to the downside. The 1942-D, 49-D, 55-D and 57-D are all lower this week. A 50 roll lot of the 1955-D was offered for sale at the new bid.

HALVES: It seems that dealers are not having as much luck these days with original rolls of Walking Liberty halves. The number of coins which meet the MS-65 criteria is shrinking. Therefore, many dealers are not willing to pay the bid levels for various dates. The 1945-D and 46-D are both lower as a result.

DOLLARS: Plus signs are scattered throughout the silver dollar columns, that is, MS-64 and higher. As has been the case lately, numerous MS-64's have higher bids. This week MS-65's join the parade, along with a slew of prooflike MS-65's. Several dealers feel prooflikes are drastically underpriced and are now willing to buy at higher levels.

PROOF SETS and MINT SETS: Earlier proof sets, those with Walkers and Mercuries in them, are extremely active, but usually carry qualifiers with the bids, such as, "gem" or "no hairlines". The 1938 and 39 sets carry no special language this week and both have higher bids. The 1956 thru 59 sets are lower as trading slows. Mint sets are slow from 1959 thru 62 as prices fall. Later sets are unchanged.

COMMEMORATIVES: Gem commemoratives stay right up there on top. Just when it seems they can't go any higher, someone proves you wrong. This week finds the 1937 and 38 Boone sets higher, along with the Hawaiian, Maine, Monroe, Roanoke, Vermont, to name just a few.

TYPE: There are numerous minus signs for type coins, but, you will find they are in selected areas. In 65, they are strictly for copper and nickel coins. In MS-63 and 64 most of the changes are minor corrections.

GOLD: The U.S. gold market has taken on some stability this week. MS-60 and lower grades indicate no minus signs for the first time in weeks. There are a few slight adjustments for selected MS-63's and 64's, but, they are not weak.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $344.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary

MS-60 (EXTREMELY FINE OR ABOUT UNCIRCULATED) Will have slight wear on the highest points of the design. Some will have full mint luster, while others will have dull surfaces and will show signs of storage or light cleaning.

MS-63 (CHOICE UNCIRCULATED) Will have many mint luster marks, may show only a slight amount of strike. Some will have full mint luster, while others will have dull surfaces and will show signs of storage or light cleaning.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

It's Not Just Any Old Saint.

OUR GUARANTEE

All coins purchased from Heritage Rare Coin Galleries are covered by an unconditional 45 day return privilege, one of the longest in the industry.

It is also guaranteed that all coins sold are genuine. As proof of our certainty that no counterfeit or altered coin can escape our attention, it is also guaranteed that we will refund the full Heritage purchase price plus 15% interest per year compounded annually on any non-authentic coin purchased through Heritage Rare Coin Galleries. If you request auction for liquidation, Heritage Numismatic Auctions, Inc., after acceptance, will catalog your coins at the same grade which you purchased them.

Each and every coin sold by Heritage is graded on both the obverse and reverse, according to the grading standards practiced by the Numismatic Certification Institute (an affiliated company). It should be understood, however, that grading is an art and not a science, and opinions on grading and value can and often differ between experts as well as other grading services. The purchaser is therefore encouraged to carefully inspect and evaluate all coins during this 45 day period. This guarantee applies to all purchases after January 15, 1986.

ORDERING INSTRUCTIONS

1. American Express, VISA and MasterCard accepted. Please include your signature and send all information on raised portion of card with order. 2. Please list your second choice, as many items are one of a kind in our stock. If ordering by type, list "same type" as your second choice. Your first choice is always sent unless already sold. 3. Free 90-day lay-away offered. Please send 25% with order and 25% per month. $200 minimum order please. Unpaid lay-aways over 90 days are returned to stock. American Express will not be accepted for lay-aways. 4. Six-month lay-away available. Call us for details. 5. Call on our toll-free WATS line 800-872-6467 on any order over $100.00. 6. All coins are graded by Heritage's interpretation of current grading standards, and are covered by our grading guarantee. 7. All coins are guaranteed to be genuine. 8. Full 45-day return privilege for any reason. 9. Texas residents add 5% sales tax on all orders under $10,000. 10. All orders shipped registered mail the same day if possible. 11. Coins may be examined in person in our offices in Dallas, Texas. Since all coins are kept in bank vaults, they are available to be viewed only during banking hours. Please call at least 30 minutes prior to arrival, so that the coins may be removed from the bank vaults. 12. Ten-day approval service available to established customers with qualified references.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MS-60 Dollars Weaker

The Market in Depth

Over the past year, silver commemoratives has been one of the leading series in MS-65. This is due partly, to the fact that there is such a small mintage in the majority of issues, let alone the limited supply which actually grades MS-65. Coupled with the increase in interest over the last few years and the power of marketing strategies, makes this series overwhelmingly sought by dealers, investors, and collectors, alike. In fact, some of the more extravagant prices paid for unusually nice coins, have been within this series. This week's update lists current individual bids for the 50 piece set as compared to May 3, 1985.

This Week's Market

CENTS: Activity continues to spark this recently ignored series. BU Lincoln rolls may not be on everyone's want list, but they are receiving more interest with each passing week.

NICKELS: Except for BU rolls of war nickels, action in the Jefferson series is sporatic, at best. This week's changes are confined to late-date issues.

DIMES: BU Rolls of Roosevelt dimes, once again, seem to be receiving some increased participation. While it's true that needs are limited, it is also true, that quantities of most dates are in short supply.

QUARTERS: BU Washington quarter rolls are receiving a much more varied list of needed dates than other series. Here again, needs are limited to just a few rolls of the desired dates.

HALVES: BU Franklin rolls remain somewhat stagnant, nevertheless, sellers are not willing to discount their rolls on a continuous basis. The only rolls lower this week are 1961-P, D, 62-P & D.

DOLLARS: MS-64 and 65 dollars remain hot this week, but anything less in quality, with few exceptions, is a difficult sell. Strictly original dollar rolls continue active at current bids, but, lesser quality, put-together rolls are usually only worth the total of their respective MS-60 bids.

PROOF SETS and MINT SETS: Silver proof sets, 1956-64, are not as busy as in recent weeks. There are more sellers than buyers and as a result bids have fallen on a few dates, 1957, 58, & 59. The 1986-S Prestige set is very much in demand at levels above issue prices.

COMMEMORATIVES: As one can see while viewing the MS-65 column, bids are up almost across the board. Even though MS-64's are trading quite actively, many dealers feel they want gem quality for their customers. Those dealers, who are a little more realistic, are willing to settle for near gems at a fraction of MS-65.

TYPE: The lack of changes, by no means, indicates a lack of interest in MS-65 and PR-65 type. It's just that the buyers are purchasing coins at current levels, when they can be found. Higher bids are not being offered, as bidders try to stock up on the material that is available at current levels.

GOLD: Circulated gold is mixed this week, with some $5's & $10's lower in VF-AU, while $20's are higher. Mint state specimens appear to be stable at this time.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $342.75 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-63 (UNCIRCULATED) Will be sharply struck with only a few bag marks. May show only a slight weakness of strike. Should have full eye appeal and above average luster.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks (definitely nicer than an MS-63). Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 — but with the additional feature of deep mirror prooflike surfaces both sides.

1891-CC P-L Morgan Dollars!

Flashy Cameo Mirror Surface MS63/63!!

SPECIAL Limited Introductory Offer to our CDN Clientele.

If you like Cameo deep P-L mirror silver dollars you will love these little gems.

Incredible, MIND-BLOWING P-L mirror on each and every coin. Obviously a first striking on these by the old Carson City Mint in 1891.

The metal texture on these is simply. . . marvelous.

SDICA is one of America's most well-known dealers in Rare Date Morgan/Peace Dollars. Send us your WANT LIST TODAY. We have an excellent inventory of scarcer date dollars in stock, all hand-selected. We are also strong buyers of silver dollar sets and collections intact.

MS-64 & 65 DOLLARS MAKING NEW HIGHS

To Certify? Yes or No

The Market in Depth

Why is the market so hot in some specific areas, yet, so slow for a large number of the dealers? One of the reasons might be grading services---new and old. Customers of dealers (the ones that are knowledgeable) are requiring certified coins; not only do they want them from reputable services, but, they want recently papered coins. To illustrate this fact, one needs look no further than a typical buy ad of some major dealers. Wanted: ANACS common Morgan dollars in MS-65/65, 1985 or '86 papers, pay bid; 1983 papers, 50% of bid. This, in itself, explains how customers perceive the redefining of the MS-65 grade over the past five years. Possibly, in answer to this grading controversy, P.C.G.S. was formed. The Professional Coin Grading Service was initiated by seven knowledgeable coin dealers in order to provide a consistent basis, by which, an initial 32 dealer group could buy and sell certified coins (PCGS coins), sight unseen, at their specified daily quotes. The concept is good. Whether this works out in the long run, only time will tell.

Since beginning its operation early in 1986, PCGS has an extremely large backlog of coins to be graded. There has been so much interest and demand that they cannot grade coins fast enough to get them into the buy/sell system. In fact, many dealers, who are not even members of the original 32 dealer group, are trading in PCGS coins, along with their other papered and non-papered coins. These non-members also offer sight unseen, buy/sell spreads. With all this demand (mostly in MS-64, 65, and better coins) and explosive advertising has come the problem of an inadequate supply of coins. This is one reason why the market can be so hot for some, yet, quiet for a lot of coin shops and for many dealers at coin shows who are not willing to deal in the current active areas of the market. This does not mean that there is no business in non-papered coins. The specialty dealers, who know how to grade and have educated their customers, are doing a land-office business, but even then, they are having a difficult time in locating enough quality coins.

As an industry, we have advertised so effectively that old-line investors do not want to sell their coins, so supplies keep getting thinner. At this rate, five years from now, investors will be buying gem Jeffersons and Lincolns, dated after 1960. When will more investment quality coins come on the market? I suppose, when investors feel that prices have gone as far as they can go and dealers recommend selling and taking profits. Can this all happen at once? Probably not. In the meantime, collectors are reappearing more and more everyday. This is what the industry needs.

This Week's Market

CENTS: If this was just about any silver series before 1945, the BU Lincoln roll market would be considered mildly active. Most buy/sell lists are of the buy variety and many of the rolls are wanted at bid. Still, quantities are limited, but, headed in a positive direction. I suppose most buyers are looking ahead to when there might be a more active singles market. And at today's levels, buyers may have time on their side.

NICKELS: The same cannot be said for BU Jefferson rolls at this time. Except for war nickels and the 1950-D, this series is fairly stagnant; not many sellers, even fewer buyers. Some war nickel rolls are higher as several bidders try to locate fresh deals. The 1943-P, D, & 45-S are now bid at $117.50 each. The 1942-S roll is $365 and 45-D is $160.

DIMES: Action here, on the plus side, is very limited (only the 1951-S is higher). Otherwise, sells are more readily apparent for most dates. It looks like the higher buyer for 1955-P dime rolls has dropped out. Whether this is temporary or not is not known.

QUARTERS: Although this series appears a little lacklustre at the moment, a few dealers are trying to buy various dates at current levels. Most sells remain at bid, if not, just a little over. The 1948-S roll is higher at $305 bid and the 1955-D is down again, now at $175 bid.

HALVES: BU Franklin rolls appear to be quite weak at this time. Buy prices, for the most part, are of the bargain-hunting variety, while most sells are at or below bid. There is a whole run of minus signs this week, as many dates seek new levels. Please see page three for all the changes. Of course, single and roll sets have followed.

BU Kennedy rolls are stable at current levels, only because sellers won't discount any further (except 1970-D).

DOLLARS: Well, it's finally hit the BU dollar roll market: The doldrums. There is strong resistance at recent levels, so there is a general correcting of bid prices. Several dates have gone unsold at discounted levels, over the last couple of weeks. And there does not seem to be much support, at least, that is, readily visible support. At shows, most buyers are in the $550 to $600 range for Morgans and around $500 for Peace (common dates). There are still very strong buyers for what are described as premium rolls.

PROOF SETS and MINT SETS: Silver proof sets, 1958 thru 1964 (excluding 1960), are adjusting downward. Various lots appear at discounted levels, yet, go unsold. The 1986-S Prestige set is trading at $60 or more. Several mint sets are lower this week. Check page 5.

COMMEMORATIVES: MS-65 commems remain very strong pricewise, but availability is very restrictive. Most of the recent shows around the country indicate that very few gems are being brought to shows and when they are available it's like prying teeth loose with a toothpick. The proud owners treat them like one of the family. That is, of course, until they put a price tag of double bid on the little jewels.

TYPE: This area of the market is very divided right now, even moreso than usual. Some dealers feel there is not enough properly graded material on the market at fair market prices, while others feel that most dealers don't even care about type. This goes for most 63 and better material. One thing for sure, there is not an overabundance of gem merchandise available at today's bids.

GOLD: U.S. gold prices are a real mixed bag this week. MS-64's and 65's remain constant and elusive. The only negative sign in MS-63 is for Saints, as sellers appear at lower levels. MS-60 and lower grades are mixed depending upon denomination. It does appear the big slide is over except for minor adjusting. Sellers are reluctant to lower prices any further.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $344.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary
